In compliance with the Financial Standing Orders Auditors A and B are competent and independent of the operations of the Council. Professional Indemnity Insurance and references have been provided.

Auditor A £147 no VAT

Auditor B £350 plus VAT

### 13. To consider information received from HeartSafe Communities with regards to community defibrillators and agree appropriate action

**HeartSafe Communities** have been tasked by Yorkshire Ambulance Service with providing defibrillators in 'Red 1 Call' zones of Yorkshire. These are rural areas around our region where it is considered critical that residents have access to a community defibrillator.

Sudden Cardiac Arrest (SCA) is the UK's biggest killer and, approximately 27 of us die in Yorkshire every day. Where early defibrillation is available to a patient, their chance of survival increases from less than 3% to over 80%. The issue with many rural areas is the response time to such an event means effective therapy being delivered by ambulance is unlikely within the critical timeframe.

Working with Yorkshire Ambulance Service we have come up with the most cost effective way to provide these vital pieces of equipment to those that are most vulnerable. This is an unrivalled proposal not available from any other Defibrillator provider.

Last year when the Government provided £1 Million through the British Heart Foundation to provide Public Access Defibrillators, it caused a surge of interest from small vulnerable rural communities and worked well to raise awareness of Sudden Cardiac Arrest (SCA) and defibrillation. Unfortunately, that money has all gone now with thousands of unsuccessful applications left still in need of this life saving equipment.

A large portion of those communities still waiting for an AED simply do not have the finance readily available to purchase one immediately. The problem is that nobody can tell when a patient will suffer a SCA. While a community is trying to raise the required funds (Typically, £1700+vat - £2000+vat) any number of people could potentially suffer an attack, and without the best possible care, their chances of survival are very small. This is why it is vital that the devices are in place as soon as possible.

Together with Yorkshire Ambulance Service (YAS), we have put together a scheme that will enable your community to install a device straight away for a much smaller outlay.

We will provide you with a temporary, reconditioned and re-calibrated device that has a 2 year warranty on it. This means that your community will then have up to 2 years to raise the finance for a brand new device.

***This offer is unlike any other available.***

- *It makes your community Heartsafe straight away*
- *You get up to 2 years extra heart protection (the time you have the temporary device)*
- *It gives you time to raise the majority of the funds at a later date*
- *And the total cost is no more than if you were to purchase 1 outright now.*

***The costings are worked out as:***

*\* £700 - Initial outlay for temporary device and brand new housing cabinet*

*\* £995 - The cost of purchasing a brand new device when funds are raised, up to 2 years from obtaining temp AED*

*Total - £1695*

Your new AED will come with a warranty of 8 years on it. With this scheme, you get up to 2 years from the temporary device and then another 8 from the new device. So it will be 10 years before you will need to start looking into a new one again.

Incredibly, for every device that is placed through this campaign in Yorkshire, YAS are prepared to hold a training/awareness session locally, with an open invitation to your community. They will look to a community centre/village hall or wherever the device is to be placed to hold the session. This is completely free of charge and is perfect for those who are receiving an AED for the first time.

This offer includes insurance and maintenance at no extra cost.

There are limited spaces available on this scheme and as you can no doubt imagine, it is very popular. If you would like any more info or would like to be involved, please feel free to contact me.

Kind Regards

Matthew Baynham
