## **PLANNING COMMITTEE**

Wednesday 11 October 2017 at 6.00 pm  
Council Chamber, Ryedale House, Malton

---

### **Agenda**

**1 Emergency Evacuation Procedure**

The Chairman to inform Members of the Public of the emergency evacuation procedure.

**2 Apologies for absence**

**3 Declarations of Interest**

Members to indicate whether they will be declaring any interests under the Code of Conduct.

Members making a declaration of interest at a meeting of a Committee or Council are required to disclose the existence and nature of that interest. This requirement is not discharged by merely declaring a personal interest without further explanation.

**4 The Ryedale Plan - Local Plan Sites Document and Policies Map (Pages 2 - 41)**

# Agenda Item 4

**RYEDALE  
DISTRICT  
COUNCIL**

---

<b>PART B:</b>	<b>RECOMMENDATIONS TO COUNCIL</b>
<b>REPORT TO:</b>	<b>PLANNING COMMITTEE</b>
<b>DATE:</b>	<b>11 OCTOBER 2017</b>
<b>REPORT OF THE:</b>	<b>GARY HOUSDEN HEAD OF PLANNING</b>
<b>TITLE OF REPORT:</b>	<b>THE RYEDALE PLAN. LOCAL PLAN SITES DOCUMENT AND POLICIES MAP.</b>
<b>WARDS AFFECTED:</b>	<b>ALL</b>

---

## **EXECUTIVE SUMMARY**

### **1.0 PURPOSE OF REPORT**

- 1.1 For Members to agree the Local Plan Sites Document and Policies Map for formal publication and submission for independent examination. Members are aware that the examination is the formal process that is designed to scrutinise the 'soundness' of the documents to ensure that they are capable of adoption as part of the Development Plan.

### **2.0 RECOMMENDATIONS**

2.1 It is recommended that:

- (i) The Sites Document at Appendix 1 of this report is agreed for formal publication and submission for examination
- (ii) The Policies Map at Appendix 2  
<http://www.ryedaleplan.org.uk/local-plan-sites/local-plan-sites-document>  
of this report is agreed for formal publication and submission for examination
- (iii) Members note the summaries of the comments received following consultations in 2015 and 2016 at Appendices 3 and 4  
<http://www.ryedaleplan.org.uk/local-plan-sites/local-plan-sites-document>
- (iv) Authority is delegated to the Head of Planning in conjunction with the Chairman of the Planning Committee to make any necessary minor typographical and grammatical changes to the Sites Document and to correct any technical mapping inaccuracies and glitches prior to the formal publication of the documents

- (v) Authority is delegated to the Officer team to provide a response to all questions, issues and matters raised during the examination and to the Head of Planning to agree minor modifications to the Plan and Main Modifications for consultation as part of the examination process
- (vi) Delegate Authority to the officer team to make a request to the Inspector appointed to examine the Plan to recommend, if necessary, modifications to the documents which would make them sound
- (vii) To update the Local Development Scheme in order to specify the dates for the subsequent formal stages in the process as outlined in paragraph 6.34

### **3.0 REASON FOR RECOMMENDATION**

- 3.1 To progress the completion of the Development Plan for the period 2012-2027.

### **4.0 SIGNIFICANT RISKS**

- 4.1 Members are aware that the policies of the development plan will be challenged through the examination process and that there are a range of risks inherent in the plan-making process. However, it is considered that there are no specific risks associated with the recommendations of this report. Indeed, it is considered that there are greater risks associated with not progressing the submission of the documents.

### **5.0 POLICY CONTEXT AND CONSULTATION**

- 5.1 Members are aware that the Ryedale Plan - the development plan for Ryedale is to consist of a number of Development Plan Documents. The Sites Document and Policies Map are key parts of the Ryedale Plan. The Sites Document contains site specific development and protection policies which are aligned to the strategic policies in the Local Plan Strategy. The Policies Map is designed to replace the 2002 Ryedale Local Plan Proposals Map. It is the purpose of the map to illustrate geographically the application of the policies in the development plan (the adopted policies in the Local Plan Strategy as well as the proposals in the Sites Document.) The new map has been produced to be used electronically.
- 5.2 The Ryedale Plan contributes to the delivery of a number of priorities in the Council Plan and Community Strategies. It also facilitates the delivery of the strategies of partners including, for example, the Local Economic Partnership.
- 5.3 Once agreed by Members, the documents will be published for a formal period of consultation. All of the 'proposed submission documents' will be made available as part of this process. These include the Sites Document, the Policies Map, the Sustainability Appraisal Report, a consultation statement and other supporting documents. The representations received will be submitted to the examination along with the documents and considered as part of the examination process.
- 5.4 The policies and proposals in the Sites Document and reflected on the Policies Map, have been directly informed by all of the consultation on the Ryedale Plan which has been on-going since 2009. In particular, this includes the Sites and Strategy public consultation in Summer 2009 as well as consultation on Preferred Sites and Site Options in October 2015 and consultation on Visually Important Undeveloped Areas (VIUA's) in October 2016. In addition, since the adoption of the Local Plan Strategy in

2013, on-going consultation with all statutory consultees as well as landowners and developers has helped to inform the policy choices proposed in the Sites Document.

## **6.0 REPORT**

### **Local Plan Sites Document**

- 6.1 The Sites Document is the element of the Development Plan that will contain site specific policies. These include policies for the protection of specific sites as well as land allocations to meet the development requirements which are already established in the Development Plan as part of the Local Plan Strategy (LPS). Members are familiar with the Local Plan Strategy and are aware of the level and type of development that the District needs to plan for. It is important to note that the process of preparing the Sites Document is not an opportunity to revisit or revise the development requirements that the District already is committed to planning for through the policies of the LPS.
- 6.2 Members are also aware that the site selection process has been an iterative process over a number of years and has been informed by a range of information relating to:
- the amount of development to be provided in different places
  - the social, economic and environmental merits of sites individually and in combination (derived for example, from technical studies or statutory consultees)
  - the deliverability of sites (including confirmation that landowners have made sites available and are aware of policy implications and the operation of the Community Infrastructure Levy)
  - technical evidence
  - public consultation responses
- 6.3 Much of this information has been compiled and held as part of the 'Site Selection Methodology' (SSM). It is designed to assess the individual merits of sites and to allow the comparative merits of sites to be considered. The SSM was itself subject to consultation prior to its application and is, in effect, the sustainability appraisal which has been used to inform site choices. Members are familiar with the application of the SSM. The assessment of sites using the SSM was the subject of briefings prior to the consultation on preferred sites and site options at the end of 2015 and the SSM tables were made available as part of that consultation. The SSM tables are continually updated to reflect the on-going receipt of information and consideration of that information. The latest SSM tables are appended to the Sustainability Appraisal Report.

### **Proposed development sites - Housing**

- 6.4 The Sites Document at Appendix 1 includes a list of proposed housing land allocations in Policy SD2. Members are reminded that the proposed amount of land allocations is a function of:
- how much housing has already been developed since the start of the plan
  - the sites that have planning permission for residential development
  - policy approach in the LPS to ensuring the plan has sufficient flexibility in its land supply to deliver planned housing requirements with certainty
- 6.5 Members are aware that the Local Plan Strategy commits Ryedale to delivering a target of 200 homes per annum (a minimum of 3,000 homes between 2012-2027). To

provide flexibility in order to ensure that planned housing requirements will be delivered, it commits the authority to identifying an additional 20% supply (600 homes); to identifying land to meet the full housing requirement and by identifying this land at those places where the plan directs growth (the Market Towns and Service Villages). The aim is to provide sufficient flexibility and choice in the land supply to ensure that planned requirements are met with certainty and to provide flexibility if any committed sites (sites with planning permission) fail to come forward. Members are also aware that the more flexibility that is built into the plan in terms of housing land supply, the more likely the Local Planning Authority will be able to continually demonstrate a deliverable 5 year housing supply in the plan period.

- 6.6 Against this background, taking account of completions and existing commitments at the Market Towns and Service Villages, there is an outstanding requirement to plan for/ allocate land for circa 1,081 dwellings. The proposed sites included in Appendix 1 amount to an indicative yield of circa 1, 097 dwellings. These figures do not take into account any future housing which comes forward from windfall/unanticipated sources or from housing that will be delivered within the area of Helmsley within the National Park.
- 6.7 Consultation on site options for the market towns and preferred sites for the villages was undertaken at the end of 2015. The consultation was used to explain the reasons why individual sites and combinations of sites had been taken forward for further consultation as well to outline why other sites had been discounted from the process. A summary of the responses received to that consultation is Appendix 3 of this report. The consultation, together with further technical information and/or deliverability information has enabled officers to recommend residential land allocations. This has been the subject of recent briefings for Members and is outlined in summary below.
- 6.8 Two sites are recommended as housing land allocations at Malton and Norton - the large Norton Lodge Site and the Ryedale House site. Members will recall the 2015 consultation consulted on two broad options for addressing residual housing requirements at Malton and Norton - a Norton emphasis (using the Norton Lodge site) or a Malton emphasis (using land at Castle Howard Road and Peasey Hills). The options were identified on the basis that they provided the only opportunities to provide land for additional primary school provision which is necessary to cater for additional growth at either town. Clearly, as is evident from consultation responses at Appendix 3, there are a range of views opposing or supporting either of these options for a variety of reasons.
- 6.9 On balance, the decision to recommend the allocation of the Norton Lodge site has been informed by a number of considerations, but in particular:
- Highway modelling that indicates benefits associated with the Scarborough Road-Beverley Road link road that will be provided as part of the scheme
  - The ability to access the site to and from the Brambling Fields full movement junction
  - Commitment of developers to delivering a policy compliant affordable housing contribution, land for new primary school provision and the link road
  - Deliverability of the site which is currently being promoted by two major housebuilders
  - Site is less sensitive in landscape terms than alternative options/choices
- 6.10 The redevelopment of the Ryedale House site provides a rare opportunity to provide additional housing in Malton on a previously developed site without a significant net increase in road traffic. The site also lends itself to the provision of some flats which form a very small proportion of the existing housing stock in the District. The

deliverability of the site is informed by confirmation that the site would be attractive to the market and that social housing provider partners have indicated an interest in working with the Council on the redevelopment of the site. The Ryedale House site was not a site that was identified as part of the Malton site 'option's package in 2015. Although the site has been put forward for consideration through the plan making process, at that time it was considered that insufficient information was available to demonstrate that the site would be developable. Whilst, the Council has not finalised decisions in terms of its asset review, a decision to allocate the site would help to confirm the sites availability and is consistent with the recent decision to prepare a business case to support the move to new premises and for housing to be built on the Ryedale House site.

- 6.11 Two residential sites are proposed at Pickering. In summary, they are the sites which are considered to be the most appropriate combination of sites to deliver residential development requirements whilst at the same time minimising the loss of historic strip field systems. These sites are two of three sites which were consulted on in 2015 as preferred site options. The third site - the large site for circa 300 homes off Firthland Road is not included as a proposed allocation in the Plan. The site had been progressed on the basis that it provided, amongst other things, the opportunity to secure land for new primary school provision at the Town. North Yorkshire County Council has recently reviewed the position in relation to school places and there is no longer a requirement for a new school to meet the needs arising from the scale of development left to plan for. It is considered that this does alter the balance between the need to release a site and to continue to protect sites that form the historic strip field system in Pickering which the Plan aims to protect. It should be noted that the two proposed site allocations can also be directly accessed from main roads.
- 6.12 In terms of Kirkbymoorside, Members will recall that two distinct options for meeting residential requirements at the town were consulted on in 2015. A package of small sites around the towns or an alternative option of allocating land to the south of the A170 in order to help facilitate the relocation of the Sylatech business. Sylatech has stated that this development option is critical to the firm's plans to relocate to Pickering. Officers are of the view that to date, it has not been demonstrated to any convincing extent that the latter option would result in the relocation of the business and which would justify the growth of the town in a direction which is generally contrary to the Local Plan Strategy. For this reason, the alternative option of using a package of smaller sites has been progressed and on that basis three small sites are proposed for allocation at Kirkbymoorside. It should be noted that this does not prevent the Sylatech business and adjacent landowners from progressing development to support the relocation of the business through the planning application process.
- 6.13 Two sites are proposed for allocation at the Service Villages. The land to the south of Aspen Way, Slingsby was consulted on as a Preferred Site at the end of 2015. However, the proposed site allocation at Amotherby is different to the site which was consulted on as a Preferred Site last year. This follows the receipt of further information confirming that the site adjacent to the school is deliverable and that the landowners are prepared to make land available for a kiss and drop facility for the school to relieve traffic pressure in the village which is associated with the school. This has meant that the site performs better than competing sites in Amotherby in the site selection methodology. Additionally, further information relating to the site (between BATA and the church) which was identified previously as a preferred site has cast significant doubt over the extent to which constraints, particularly noise can be addressed.

### **Proposed development sites - Employment and Retail**

- 6.14 The draft Sites Document recognises that existing commitments address most of the outstanding need for further land for employment and retailing. For the reasons outlined in the document, the allocation of employment land is limited to land south of the existing Thornton Road Industrial Estate, Pickering and a 'broad location' for future employment development is indicated in the Eden Camp area of Old Malton, to be released if required in the plan period. In terms of retailing and in summary, it is proposed that the Malton Town Centre Commercial Limits are expanded to include the existing Livestock Market Site (LMS) and that outstanding space requirements for non-food retailing are met through the redevelopment of buildings and space within Town Centre and Northern Arc. The approach is aimed at facilitating the redevelopment of the LMS site and is proposed in the context of the recent history of applications for retailing at the Town.
- 6.15 Members are aware that three sites for the expansion of existing businesses (BATA at Amotherby; Malton Foods at Amotherby and Sylatech, Kirkbymoorside) were identified under the previous development plan. Each of these businesses have confirmed that they may still be required by these companies in the future. Clearly however, the sites have not been required to any significant extent to date. So as not to prejudice the long term operation of these business it is considered that the expansion sites should continue to be identified in the plan. However it is considered that the Development Limits (drawn around these expansion sites) should be pulled back to the existing boundaries of the business site. This will ensure that the principle of development for other uses is not established in the event that the sites continue to not be needed.

### **Proposed additional Visually Important Undeveloped Areas (VIUA's)**

- 6.16 Members are aware that VIUA's are a longstanding local policy designation in the Development Plan which area aimed at protecting undeveloped spaces that are considered to contribute significantly to the character and form of settlements.
- 6.17 Following a report to Planning Committee in September 2016, consultation on a number of potential new VIUA sites was undertaken. The responses received are summarised at Appendix 4 of this report. In general, the proposed sites have been well received by local communities and local councils, but have met with some opposition, for the most part, from landowners and their representatives. The proposed VIUA sites were at Welburn; Slingsby; Amotherby; Hovingham; Ampleforth; Pickering; Norton and Old Malton.
- 6.18 It is considered that the sites proposed as VIUA's in 2016, meet the purpose of the designation. Development requirements for the plan period can be met without requiring these sites and for these two reasons, they are proposed as new VIUA sites in the Sites Document.
- 6.19 As part of the consultation, a number of additional sites have been proposed as VIUA's by respondents. These are:
- Land at Folliott Close, Malton
  - Land to the south of Westgate Lane, Old Malton and north of Peasey Hills, Malton

- Land to the north and south of Castle Howard Road, Malton and within the A64
  - Land to the north of Middleton Road, Pickering
  - Land to west of Welham Road, Norton and east of Langton Road, Norton
- 6.20 Members will be aware that the Castle Howard Road Sites and the site to the north of Peasey Hills are sites that the Council has consulted on as the development option for the Principal Town which provide a Malton emphasis. The application of the Site Selection Methodology has recognised that the Castle Howard Road sites have landscape merit and, that as fields on the edge of the Town they form part of the setting of the Town. Similarly, the SSM recognises that the open nature of the land north of Green Lane at Peasey Hills contributes to the setting of Old Malton and its Conservation Area. Notwithstanding this, the sites were consulted on as a development option 'package' on the basis that they represented a site combination which would allow residual development requirements to be provided at the Principal Town with the ability to secure land for additional primary school provision.
- 6.21 The completion of the Site Selection process and supporting technical evidence, has enabled Officers to recommend the allocation of the Norton Lodge site to address, for the most part, the development requirements of the Principal Town. Land at both the Castle Howard Road and Old Malton are not required to address residential requirements for this plan period and the extent to which these sites may be required in the longer term will depend on the development strategy of a future plan and the role of Malton as determined in a future planning strategy. Against this context as well as consultation responses seeking their designation as VIUAs, it is appropriate for this Plan to consider the merits of these sites as VIUAs.
- 6.22 In terms of the Peasey Hills site, representations have been received which make the point that the contribution that the land to the north of Peasey Hills makes to the setting of the Grade 1 Listed St Mary's Priory Church had been underestimated in Site Selection Methodology. Officers have revisited the site in the light of comments made and have revised the SSM. There are points along Westgate Lane and Rainbow Lane which afford significant views of the church across the site. It is considered that the contribution of the site to the setting of the listed asset had been previously underestimated and therefore, the SSM has been revised accordingly.
- 6.23 For the reasons outlined above, the land to north of Peasey Hills is now proposed as new VIUA designation in the draft document.
- 6.24 Officers have considered consultation responses which seek the designation of the Castle Howard Road sites. The sites do provide an attractive rural edge to the town and have strong landscape character. However, it is considered that the sites do not provide a strong appreciation of the traditional form and character of the town and in this respect, in an undeveloped state they do not make a significant contribution to the setting of the Town and the role of setting in helping to appreciate the form and character of the town and in the identification of VIUA's.
- 6.25 Officers have also considered requests to designate land to the north of Middleton Lane in Pickering and further open land around the edge of Norton as VIUA's. The land at Pickering is already identified as an Area of High Landscape Value in the Plan and is similar in character to much of the wider area to the north of the and west of the Town. It is considered that in itself, the open nature of the site, whilst forming part of the setting of the Town does not make a significant contribution to the built form and character of the Town. In this respect, it is considered that the site itself does not make

a significant contribution to the setting of the Town and the role of setting in helping to identify VIUA's.

- 6.26 Whilst Officers appreciate the reasons why further land at Norton has been requested as a VIUA, particularly in relation to impact on the horse racing industry, this is not in itself a reason for the designation. It is considered that wider stretches of land further to the west of Welham Road and east of Langton Road have less of an influence on an appreciation of form and character of Norton (and Malton) and in this respect, they make a limited contribution to the setting of the Town and the role of setting in helping to identify VIUA's.
- 6.27 The land at Folliott Ward Close is considered to contribute to the form and character of this part of Malton and on that basis, has been included as a new VIUA in the Sites Document.
- 6.28 Inevitably proposed new VIUA's will attract formal objections from some parties and the merits of the proposed new VIUA's will be considered as part of the examination process.

### **Policies Map**

- 6.29 The Policies Map provides a geographical illustration of the policies of the Ryedale Plan and has been produced as an electronic interactive map. On adoption it will replace the 2002 Proposals Map.
- 6.30 All of the development land allocations proposed in the Sites Document together with new proposed VIUA's and committed development schemes are shown on the map.
- 6.31 Existing policy tools such as Development Limits, Town Centre Commercial Limits and Areas of High Landscape are carried forward by the Local Plan Strategy and are mapped accordingly. Changes to these are limited to:
- consequential amendments to boundaries as a result of the proposed allocation of land or to reflect committed development sites
  - to address cartographical anomalies in the mapping of the 2002 Proposals Map; Ordnance Survey positional accuracy and minor adjustments to the National Park boundary which have been made since previous maps were prepared.
- 6.32 A summary of the main changes to the Policies Map is as follows:
- Inclusion of proposed development sites;
  - Inclusion of new VIUA's;
  - Repositioning of development limits to take account of new development sites and committed development schemes;
  - Repositioning of development limits to exclude land identified for the expansion of existing employers;
  - Inclusion of the broad area of the 'Northern Arc';
  - Repositioning of the Malton Town Centre Commercial Limits to take account of the committed development scheme on the Livestock Market Site;
  - Identification of further sites as existing employment areas and areas of open space to reflect up to date information;
  - Adjustments to the boundaries of the following VIUA sites: land at Old Malton; grass verge, Thornton-le-Clay; land to the north of the A170, Ebberston; land to the East of

- the Cricket Pitch, Flaxton; Land to the south of Old Malton Road, Staxton and;
- The following sites are no longer shown as VIUA's:
  - The Showfield, Malton
  - Land South of Coronation Farm, Old Malton
  - Land to the east of Beckett Close and west of Station Road, Nawton
  - The Lodge, 103 Middleton Road, Pickering

### **Local Development Scheme**

- 6.33 It is a procedural requirement that development plan documents, such as the Sites Document and the Policies Map are produced in accordance with the Council's Local Development Scheme (LDS). The LDS specifies that these documents will be produced by the Council. A resolution to agree the documents for publication and submission will enable the dates for these key milestones to be updated and confirmed in the LDS.
- 6.34 It is considered that the LDS should be revised to show the following milestones:
- Publication - November 2017
  - Submission - March 2018
  - Anticipated Adoption - December 2018

## **7.0 IMPLICATIONS**

- 7.1 The following implications have been identified:
- a) Financial  
Budget provision exists for examination costs based on estimated costs.
  - b) Legal  
The Sites Document and Policies Map will form part of the Development Plan for Ryedale on adoption
  - c) Other (Equalities, Staffing, Planning, Health & Safety, Environmental, Crime & Disorder)  
A range of assessments including, Sustainability Appraisal and Strategic Environmental Assessment and Habitat Regulation Assessment have been undertaken to inform the preparation of the Ryedale Plan.

## **8.0 NEXT STEPS**

- 8.1 A range of administrative tasks and supporting documentation need to be completed before the plan can be formally published. Publication of the documents is a formal stage of consultation for six week period. The representations received at this stage are those that are considered during the examination period. It is anticipated that the documents will be submitted for examination in March 2018.
- 8.2 Prior to the formal publication of the Plan, the next meeting of Planning Committee (October 2017) will be asked to consider and finalise detailed responses to the comments received following the previous Site Options and VIUA consultations.

Development Plan Document

Proposed Submission Document. October 2017

## **Contents**

### **1. Introduction**

### **2. Land for Housing**

- SD 1 Existing Residential Commitments
- SD2 Residential Land Allocations
- SD3 Housing Allocation -Land to the east of Beverley Road, Norton: Development Principles
- SD4 Housing Allocation - Land to the west of Old Maltongate (Ryedale House), Malton: Development Principles
- SD5- Housing Allocation - Land to the east of Whitby Road, Pickering: Development Principles
- SD6 - Housing Allocation - Land to the West of Malton Road, Pickering: Development Principles
- SD7- Housing Allocation - Land to the south of Swineherd Lane, Kirkbymoorside: Development Principles
- SD8- Housing Allocation - Land to the north of Keld Head Close, Kirkbymoorside: Development Principles
- SD9 - Housing Allocation - Brickworks Site, to north of Swineherd Lane, Kirkbymoorside: Development Principles
- SD10 - Housing Allocation- Land to the south of Amotherby Primary School, Amotherby: Development Principles
- SD11 - Housing Allocation - Land to the south of Aspen Way, Slingsby: Development Principles

### **3. Land for Employment Uses**

- Policy SD12 New Employment Land Allocations
- Policy SD13 Expansion Land for Existing Employers

### **4. Land for Retailing**

- Policy SD14 Retail Commitments

### **5. Specific Sites**

- Policy SD15 Flamingo Land and the National Agri-Food Innovation Campus

## **6. Visually Important Undeveloped Areas**

- Policy SD16 Visually Important Undeveloped Areas (VIUAs)

## **Appendices**

Appendix 1 - Saved ( Ryedale Local Plan 2002) policies superseded by policies in this document.

Appendix 2- Residential completions, commitments, residual requirements and proposed allocations by location

## 1. Introduction

- 1.1 This document has been produced as part of the Ryedale Plan - the development plan or 'local plan' for the area which covers the period 2012-2027. It contains site specific policies for the development of land within this period for a range of land uses. It also includes a limited number of site specific protection policies.
- 1.2 Sites have been identified or allocated for development in this document in order to ensure that the amount of development that the District is committed to providing to 2027 is achieved within this period.
- 1.3 The Local Plan Strategy (LPS) was the first document to be produced and adopted as part of the Ryedale Plan. The strategy document is that part of the development plan which established the amount and type of new development required within the plan period to 2027. It provides a strategic planning policy framework, including settlement hierarchy and principles for the development and growth of different settlements to guide the identification of site specific development sites in this document. The Local Plan Strategy was adopted on 5 September 2013 following an examination process which spanned the introduction of the National Planning Policy Framework and which found it to be fully compliant with national policy. Against this background, this document has been produced to comply with and to deliver the adopted Local Plan Strategy.
- 1.4 This document does not allocate specific development sites at Helmsley. Helmsley is identified as a Local Service Centre in the Local Plan Strategy although site specific policies for the Town are included in the Helmsley Plan. The Helmsley Plan is a development plan document which has been jointly prepared by the District Council and the North York Moors National Park Authority to ensure a consistent and holistic approach to planning in the town. This is because the boundary of the National Park runs through the Town and each authority is a Local Planning Authority. The Helmsley Plan was adopted on 9 July 2015 and forms part of the Development Plan for Ryedale..
- 1.5 It is important to note that the allocation of a site for a particular use in this document is not the same as receiving planning permission for the development of the site. A land allocation is intended to provide policy support in principle for the use of the site. Planning permission will still be required for the specific use/uses for which a site is allocated.
- 1.6 A new Policies Map has been prepared in conjunction with the preparation of the Sites Document . The Policies Map illustrates geographically the policies in the Local Plan Strategy and the site specific policies and proposals in this document.
- 1.7 The Local Plan Strategy replaced the majority of the saved policies of the previous Ryedale Local Plan (2002). This document is designed to supersede the remaining saved policies. These are listed in Appendix 1.

## 2. Land for Housing

- 2.1 Policy SP2 of the Local Plan Strategy (LPS) establishes the amount of new housing to be delivered in Ryedale to 2027. It sets out how this is to be distributed across the settlement hierarchy (Policy SP1) and identifies the amount of new housing which will be provided at each of the different towns and some villages. Policy SP2 also lists the sources of new housing that will address housing requirements in different parts of the District.
- 2.2 The District Council, as Local Planning Authority is committed to ensuring the delivery of 200 homes per annum and a minimum of 3,000 new homes over the plan period. The LPS makes it clear that a sufficient and flexible supply of housing land will be identified in order to ensure these requirements are met. On this basis, the Council is committed to identifying sufficient land in full to meet housing requirements. An assumption for an amount of housing coming forward from future unanticipated or 'windfall' sources will not be used to reduce the amount of land that will need to be identified for new housing.
- 2.3 In order to deliver a positive strategy for housing growth, Policy SP2 aims to direct the housing land required to meet housing requirements to those settlements which are expected to accommodate planned growth in the settlement hierarchy. The policy also proportionally distributes the minimum housing requirement of 3,000 dwellings across these settlements.
- 2.4 Furthermore, the Council is committed to identifying a further 'supply buffer' as part of the plan making process which is the equivalent of an additional 20% of the District's planned housing requirement (600 homes). This is to build flexibility into the plan in a plan-led way. To ensure that this additional supply buffer complements the strategic approach of the plan, this additional supply is identified at those settlements in the settlement hierarchy where the Plan directs housing growth.
- 2.5 As well as the approach to housing land supply, the LPS establishes a local policy approach (The 'Zone of Tolerance') which supports the delivery of an additional 25% (750) of homes over and above the minimum 3,000 requirement. Together, the approach of the Zone of Tolerance and the plan-led supply buffer work together to:
- ensure that 200 dwellings per annum are delivered annually with consistency and certainty
  - provide a plan-led approach to supporting and managing the delivery of 3,000 homes as a minimum requirement which reflect sustainability parameters and tolerances at the main towns
  - To provide flexibility for the plan in the event that housing requirements increase or if committed housing sites fail to come forward.
  - To avoid under delivery and subsequent overly complicated arguments in appeal situations which can lead to an undermining of the development plan and a plan-led approach to managing development in Ryedale.

- 2.6 In order to establish how much land should be allocated for housing in this document to accord with the LPS, account has been taken of the number of new homes completed since the start of the plan (2012) and of housing commitments (sites with planning permission for housing and which can be under construction or not started).
- 2.7 The LPS commits to the provision of at least 150 new homes at Helmsley for the plan period. The adopted Helmsley Plan identifies land for approximately 190 new homes at the town. This is under a joint arrangement with the North York Moors National Park Authority to provide land for housing identified in the Local Plan Strategy across both planning authority areas through the Helmsley Plan. Additional sources of supply including 'windfall' development and plots with planning permission at the point the plan was adopted will also contribute to the delivery of additional homes. There is no requirement for this document to identify further housing land at Helmsley.
- 2.8 In summary, 1274 (net) dwellings have been completed across the District since 1 April 2012 and at 31/3/17, commitments (planning permissions and land allocations in the Helmsley Plan) existed for a further 1,416 (net) dwellings. Taking account recent permissions and significant minded to approve decisions (for 52 dwellings at Firthland Road, Pickering; 26 dwellings at East Hill House Farm, Thornton-Le-Dale; 12 dwellings at Peckets Yard, Sheriff Hutton and 87 additional dwellings on the Showfield, Malton) this rises to a committed supply of 1,593 dwellings. This figure is reduced to 1,531 to take account of the fact that one major committed site is not considered to be deliverable (the ATS site in Norton for 62 units). In total 2,475 completions and commitments are at the Market Towns and Service Villages. Appendix 2 illustrates the position.
- 2.9 Existing commitments account for a significant proportion of the housing land supply for the plan period. All large site commitments which are either under construction or which have planning permission and are not started are identified on the Policies Map. The majority of existing large site commitments are sites that have been granted planning permission by the Local Planning Authority in advance of the completion of this document. For the most part, this has been to ensure that a sufficient supply of deliverable housing land is continually available to meet housing requirements. All of these sites have been released in locations which broadly support the delivery of the plan's spatial strategy (Policy SP1) and principles for guiding development at the Towns. In a limited number of circumstances, sites have been released on appeal, after the Local Planning Authority had made a decision to refuse planning permission.
- 2.10 Whilst many of the sites that have been granted planning permission for residential use are now under construction, the development of a limited number of sites has not started. Each of these sites have been assessed alongside other sites that have been put forward by landowners as part of the plan-making process. This has helped to inform whether the sites can continue to be relied upon as deliverable or developable sites should the current permission expire or whether alternative sites should be identified. Following this, only the current permission at the ATS in Norton for 62

units is not relied upon for calculating residual housing requirements. Policy SD1 aims to ensure that large site commitments are treated as land allocations in the event current permissions expire.

#### **SD1: Existing Residential Commitments**

Residential development sites shown on the Policies Map as existing residential commitments will continue to be supported in principle, for residential development which is consistent with a site's existing permission

- 2.11 Housing Land Allocations are listed in Policy SD2. Each of the sites have been selected from a large number of sites that have been put forward by landowners as part of the plan-making process. Site Specific choices have been made using a range of information. This includes the use of a Site Selection Methodology which has been compiled for this purpose and by taking account of:- the aims and objectives of the Ryedale Plan and the principles for guiding development at the settlements which are established in the Local Plan Strategy; consultation responses and; residual housing requirements.
- 2.12 The Site Selection Methodology (SSM) was devised in consultation with a range of stakeholders to assess the sustainability credentials of individual sites and the deliverability and availability of individual sites. The SSM is , in effect, a sustainability appraisal framework for the assessment of sites. It uses settlement specific sustainability issues to enable comparisons of the merits/ disbenefits of sites to be drawn. The ability of sites to address the objectives of the Ryedale Plan has also informed the selection of sites.

### SD2 Residential Land Allocations

The following sites are allocated for residential development and are identified on the Policies Map.

Settlement	Site	Area (Ha)	Indicative Yield
Principal Town			
Malton and Norton	Land to the east of Beverley Road	24.29	600 (540 in the plan period)
	Land at Old Maltongate (Ryedale House Site)	1.44	60
Local Service Centres(Market Towns)			
Pickering	Land to the east of Whitby Road	8.58	250
	Land to the east of Malton Road	3.7	110
Kirkbymoorside	Land to the south of Swineherd Lane	1.46	35
	Land to the north of Keld Head Close	0.85	18
	Land to the north of Swineherd Lane (The Old Brickworks)	0.38	8
Local Service Centres(Service Villages)			
Amotherby	Land to the south of Amotherby Primary School	2.83	40
Slingsby	Land to the south of Aspen Way	1.71	36

The yield identified for each site is indicative and the precise number of residential units to be provided on each site will be determined at the planning application stage.

- 2.13 The allocations at Malton and Norton will contribute to the delivery of significant infrastructure improvements and , in combination, will enable a choice and mix of new homes to be provided. The Norton Lodge site will provide a link road between Scarborough Road and Beverley Road which is recognised as necessary for the delivery of the site, and also a significant strategic transport improvement for the Principal Town. Whilst the road is not a bypass, the provision of the road together with the location of the site which enables access using the Brambling Fields A64 junction helps to mitigate the impact of traffic on the central road network. The site has also been promoted on the basis that land will also be made available for educational purposes. Additional primary school capacity is necessary to address the requirements arising from the cumulative planned growth of the Principal Town. The site is also considered to be less sensitive in landscape terms than comparable alternatives.
- 2.14 The Ryedale House site complements the Norton Lodge site and existing committed sites in that in terms of design and character, the site is appropriate for the provision of some flats/apartments, which do not form a significant element of the District's existing housing stock. The redevelopment of the Ryedale House site would also have the advantage of supporting additional residential development at the Town without significant net increases in traffic given that the site is in an existing use as offices. It also provides an opportunity to develop housing on a previously developed site.
- 2.15 The combination of sites identified at Pickering reflect objectives of the Ryedale Plan, to minimise the impact of development on historic medieval field patterns which are a characteristic feature of Ryedale's northern Market Towns (and Pickering in particular) and a significant heritage asset. The sites at Whitby Road and Malton Road will ensure that further residential development can be accommodated at the Town without impacting upon the medieval strip field system. Both sites provide good access to the existing road network
- 2.16 The housing sites allocated at Kirkbymoorside reflect the limited availability of deliverable sites in locations that reflect the principles for the development at the town in the Local Plan Strategy and the fact that there is a large single site commitment at the town at Westfields.
- 2.17 The approach to the allocation of sites for residential uses at the Service Villages reflects the strategy of the plan (Paragraph 3.30 of the Local Plan Strategy) to ensure that planned housing requirements are distributed across the Service Villages and not focussed in relatively few settlements. As well as the availability of sites and suitability of sites, particularly in terms of the character of villages, account has been taken of existing commitments and any recent history of housing development in each of the service villages.

- 2.18 Where developers and landowners have supported the promotion of sites with indicative development/layout details, these have been used to inform the indicative site yields from allocated sites. For the most part this work has revealed densities at approximately 35 dwellings per hectare. For other sites, yields have been estimated using a minimum indicative density of 30 dwellings to the hectare (and applying a x 0.7 developable area factor to take account of site infrastructure). Although the Plan does not prescribe density standards, the majority of housing sites on the edge of existing towns and villages will be built at moderate densities and on that basis, 30 -35 dwellings to the hectare is considered to be a reasonable basis for assuming indicative yields. The yields are indicative, and clearly this does not prevent sites being delivered at a higher density, if in design and character terms this would be appropriate. Overall, however, it is considered that the approach taken has not over estimated the yield from the allocated sites but rather, it represents a relatively conservative approach.
- 2.19 Policy SD2 provides for the delivery of circa 1,157 dwellings from allocated sites, with 1,097 of these anticipated within the plan period. Taking account of completions and commitments on a District- Wide basis, this means that there is the potential for approximately 3,900 homes to be built within the plan period across the District which does not include additional homes coming forward from small site windfalls arising across the plan area or from housing built in the area of Helmsley which is within the North York Moors National Park.
- 2.20 It is anticipated that through a combination of completions, commitments and allocations, there is potential for approximately 3,572 new homes to be delivered in those locations where the plan directs new housing development. ( The figure does not include the additional housing identified in the Helmsley Plan). This ensures that the proportional distribution of the housing requirement of 200 dwellings per annum is in accordance with Policy SP2 of the Local Plan Strategy. However, in allocating sites to provide for the supply buffer in addition to the residual planned housing requirement, the resulting proportional distribution does not follow precisely, the distribution established in SP2 although it continues to reflect the Plan's strategic settlement hierarchy. This is because at the time that this document is produced, a large number of housing sites have already been released in advance of the plan-making process and the choice of sites has been made against this context, changing requirements and on-going sustainability appraisal including the sensitivities and circumstances of different settlements.
- 2.21 The Local Planning Authority is mindful of the fact that not all planning permissions will result in housing completions and that a small proportion of the existing housing stock will be demolished as new homes are built. The Council's Strategic Housing Land Availability Assessment (SHLAA Part 1) takes account of these matters when the deliverable five year supply position is monitored annually. An assumption for demolitions and non-implementation have not been made as part of calculating the residual amount of housing land to be allocated. This is because an assumption for demolitions and non-implementation is more than made up for by the commitment to providing a supply buffer and because a small supply of housing also comes forward from small sites in the more rural locations where the plan does not direct growth.

- 2.22 It is considered that the housing land supply - existing commitments together with land allocations will be more than sufficient to ensure that planned rates of house building in Ryedale (200 dwellings per annum) will be delivered with confidence and that the supply is sufficient to cater for the operation of the Zone of Tolerance. Moreover, allocated sites in this plan are not phased and this, again, is designed to provide further flexibility in the maintenance of a supply of deliverable housing land.
- 2.23 The LPS recognises that extra-care facilities are required at some of Ryedale's towns to meet the needs of North Yorkshire County Council. The Helmsley Plan secures appropriate provision at Helmsley and a facility has been provided at Norton. North Yorkshire County Council (NYCC) has indicated that it is keen that land for such facilities is secured as part of allocated residential sites at Kirkbymoorside and Malton. This is unlikely to be achieved given that a significant proportion of sites are already committed. The current position does not necessarily preclude extra-care provision from being provided on the limited number of allocated sites in these locations, if NYCC are able to work with developers to secure provision in the longer term. However, the District Council will continue to work with NYCC to help secure provision in alternative ways including through the redevelopment of existing NYCC sites or through new purpose built sites. The allocation of the Ryedale House site adjacent to NYCC's existing facility at Malton may provide a key opportunity to co-ordinate the redevelopment of both sites.
- 2.24 Policy SP5 of the Local Plan Strategy commits the Local Planning Authority to identifying land for additional Gypsy and Traveller pitches if an updated assessment reveals a requirement. A recent assessment undertaken for the Council by Arc 4 has concluded that the existing Tara Park site at Malton is sufficient to meet identified needs.
- 2.25 Policies SD3-SD11 establish a number of principles for the development of the allocated housing sites. These are designed to reflect site specific circumstances and, in many cases a number of the principles reflect that basis on which sites were assessed as part of the plan-making process.

## Housing Land Allocations. Development Principles

### SD3 Housing Allocation -Land to the east of Beverley Road, Norton: Development Principles

Detailed proposals for the development of the site shall include:

- a new road linking Beverley Road to Hugden Way
- implementation of a MOVA system at the junction with Scarborough Road and Westfield Way
- 2 ha of land for new primary school provision
- a substantive landscape, visual and noise attenuation buffer between the housing development and the Malton Bacon Factory
- a Neighbourhood Area for Play (NEAP)
- integrated site and boundary landscaping to include landscape areas for play and fitness and to soften the visual impact of the scheme
- reinforcing existing connections and creating new connections to the school site and where possible , the existing built up area and the surrounding countryside
- well defined hierarchy of streets and spaces
- pedestrian and cycle only routes in and through the development to site access points, the school site and NEAP
- access from Beverley Road and the new link road
- maximise opportunities for green infrastructure, including 3 phase Sustainable Drainage Systems
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

#### **SD4 Housing Allocation - Land to the west of Old Maltongate (Ryedale House), Malton: Development Principles**

Detailed proposals for the development of the site shall include:

- larger scale development in block form to middle and front of the site ( with potential for flatted development)
- smaller scale housing development to the rear of the site
- landscaped and tree lined setting to Old Maltongate to be retained
- design to a high specification, drawing on the architectural character and detailing of high status buildings on along Old Maltongate
- use of the existing access off Old Maltongate
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

#### **SD5- Housing Allocation - Land to the east of Whitby Road, Pickering: Development Principles**

Detailed proposals for the development of the site shall include:

- a built form, layout and design detailing that works with the topography and contours of the site
- integrated site and boundary landscaping to include landscape areas for play and fitness
- on-site children's play space (LEAP)
- pedestrian and cycle only routes in and through the development to the site access
- well defined hierarchy of streets and spaces
- access from Whitby Road
- scale of buildings to be limited to two storeys
- sustainable drainage system to be integrated into design which reflects the Source Protection Zone, in regards to Surface water drainage scheme and Foul water drainage scheme
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

#### SD6 - Housing Allocation - Land to the west of Malton Road, Pickering: Development Principles

Detailed proposals for the development of the site shall include:

- integrated site and boundary landscaping to include landscape areas for play and fitness
- open space/Green Infrastructure to the west of the site ( as shown on the Policies Map) is excluded from the developable area to ensure the developable area is outside area at risk of flooding
- retention of the substantive boundary hedge to the Malton Road
- a strategic landscaping swath to the south of the site to define and reinforce the southern approach to the Town
- pedestrian and cycle only routes in and through the development to the site access
- well defined hierarchy of streets and spaces
- designed to enable views of the Spire of the Church of St Peter and St Paul from the Malton Road when approaching the town
- access from Malton Road
- pedestrian and cycle access to Haygate Lane, the open space to the rear of the swimming pool and the public footpath to the western boundary of the site
- on-site children's play space (LEAP)
- sustainable drainage system to be integrated into design
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

**SD7- Housing Allocation - Land to the south of Swineherd Lane, Kirkbymoorside: Development Principles**

Detailed proposals for the development of the site shall include:

- access from Swineherd Lane
- pedestrian and cycle only access to Duna Way; Stuteville Close and the recreation facilities to the south of the site
- retention of the public footpath through the site
- landscape buffer to the eastern boundary
- careful attention to the scale and mass of buildings to the eastern side of the site
- well designed street and spaces
- sustainable drainage system to be integrated into design
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

**SD8- Housing Allocation - Land to the north of Keld Head Close, Kirkbymoorside: Development Principles**

Detailed proposals for the development of the site shall include:

- access from Keld Head Road
- retention of mature boundary trees and landscaping scheme to enhance boundary landscaping
- scale of buildings to be limited in height to two storeys
- sustainable drainage system to be integrated into design
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

#### **SD9 - Housing Allocation - Brickworks Site, to north of Swineherd Lane, Kirkbymoorside: Development Principles**

Detailed proposals for the development of the site shall include:

- access from Swineherd Lane
- buildings not to exceed two storeys in height
- layout and form to ensure a broken mass of buildings with a strong frontage to the road
- retention of mature boundary trees
- sustainable drainage system to be integrated into design
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

#### **SD10 - Housing Allocation- Land to the south of Amotherby Primary School, Amotherby: Development Principles**

Detailed proposals for the development of the site shall include:

- access from the B1257
- retention of Public Right of Way through the site
- pedestrian and cycle only link to Meadowfield
- land to be provided for a kiss and drop facility for Amotherby Primary School ; public open space and children's play area within the northern quarter of the site
- retention of hedge along boundary with the B1257
- well designed streets and spaces
- landscaping belt to the western site boundary
- scale of buildings to be limited to one and two storey heights
- sustainable drainage system to be integrated into design
- Capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

# **SD11 - Housing Allocation - Land to the south of Aspen Way, Slingsby: Development Principles**

Detailed proposals for the development of the site shall include:

- comprehensive scheme for both fields, which could be phased
- retention of hedge to boundary with B1257
- retention of mature trees lining the Balk and suitable landscape/open space buffer along the western boundary of the site in order to ensure the protection of these trees
- vehicular access from Aspen Way to extend up the boundary with the eastern field, so as to ensure unfettered access of both fields
- pedestrian and cycle only access to the Balk and the Street
- Scale of buildings to be limited to one and two storey heights
- well designed streets and spaces
- sustainable drainage system to be integrated into design
- Technical capability for electric vehicle charging through the provision of a 13 amp electrical socket
- Lighting scheme to minimise glare, reduce energy usage, and protect amenity

### 3. Land for Employment Uses

- 3.1 Policy SP6 of the Local Plan Strategy provides for the identification of up to 45 hectares of land for employment purposes. The policy commits to the allocation of two tranches of employment land- an initial 37 hectares followed by a further 8 hectares to be released if this is required over the plan period. The approach reflects the range in the quantum of employment land which was identified by employment land forecasts used to inform the plan. The policy establishes an approach to distributing these requirements across specific settlements, as outlined in the table below. A significant proportion of the initial 37 hectares has been released in advance of the preparation of this document and is committed, under construction or has been completed.
- 3.2 In total this accounts for approximately 31 ha (gross) of the initial 37 ha. In addition, 1.9 hectares of employment land has been allocated in the Helmsley Plan (Policy H4) and this accounts for a significant proportion of the employment land which the Local Plan Strategy distributes to Helmsley and Kirkbymoorside. The current position is outlined below. It should be noted that the completion and commitment figures relate to major employment sites/ schemes and do not include employment space that has been created through the small scale conversion of existing buildings.

	Local Plan Requirement	Commitments/Completions/Helmsley Plan Allocations	Residual Requirement
Malton and Norton	29.6-36ha	26.6ha	3 - 9.4ha
Pickering	5.55ha-6.75ha	0ha	5.55-6.75ha
Kirkbymoorside and Helmsley	1.85-2.25ha	2.57ha	0
Total	36-45ha	29.17 ha	7.8-15.8ha

- 3.3 The release of just over 17 ha of land at Eden House Road off the A64/ A169 junction at Old Malton accounts for a considerable proportion of land currently committed for employment uses as well as a significant proportion of the land to be accommodated at the Principal Town. The site is considered to be a major employment/business opportunity for the District which occupies a good location in relation to the Principal Town and strategic road network. The site has planning permission for the development of an agri-business park for B1, B2 and B8 uses; an Agricultural Business Centre and new livestock market. In 2015, the site was established as the Malton Food Enterprise Zone (FEZ), as part of the Department of

Environment, Food and Rural Affairs, 'Pathfinder Food Enterprise Zone' initiative. To support the development of the FEZ; to attract new investment and employment opportunities locally and; to assist in the delivery of the objectives of the York, North Yorkshire and East Riding Local Enterprise Partnership (LEP), a Local Development Order covers the site in order to help facilitate a focus on the agri-food sector in this location.

- 3.4 Existing commitments, including the allocation of 1.9 ha of land at Helmsley (in the Helmsley Plan) account for the planned employment land requirement for Kirkbymoorside and Helmsley.
- 3.5 At present, 6.6 ha of land to the south of Thornton Road Industrial Estate at Pickering is the subject of a 'minded to approve' decision by the Local Planning Authority for B1 and B2 uses. The proposals for the site have been progressed by an existing local employer seeking to relocation space as well as to facilitate the development of further employment space at the town. The site forms a logical extension to the existing industrial estate, performed well through the site assessment process and has been therefore allocated for employment purposes. This will confirm the principle of its suitability as an employment site into the future in the event that the current proposals are not taken forward, and may also assist in securing the public or private investment needed to undertake the remediation required to develop the site.
- 3.6 Completions commitments and proposed allocations account for 35.7ha of land which addresses the initial tranche of land that the Authority is committed to identifying. This is however, on a District-wide basis and results in a small shortfall against the approximate distribution figures for Malton and Norton.
- 3.7 The Local Plan Strategy directs the majority of employment land requirements to Malton and Norton and land releases to date have supported this strategic approach. However, additional employment land allocations at Malton and Norton have not been made in this document. As an alternative, land in the vicinity of the Malton Agri-Business Park at the A64/A169 junction is promoted as a broad location for further employment land releases to meet identified requirements if they are needed within the plan period. This is in part driven by the limited availability of alternative, suitable and deliverable sites as well as uncertainty over the rate at which the current proposals for the Agri- Business Park/FEZ will be built out. It is considered that this reinforces the commitment to this area being a strategic employment opportunity and provides flexibility for a range of types of employment to be provided and co-ordinated, particularly if the Food Enterprise Zone and Local Development Order are successful in attracting agri-food business to the site which has already been released.

## Policy SD 12 New Employment Land Allocations

The following sites are allocated or committed, as indicated on the Policies Map, for the development of the employment uses specified:

### Employment Land - Commitments

- |  |        |               |
|--|--------|---------------|
| • York Road Industrial Estate, Malton                                      | 6.8ha  | B1,B2,B8 uses |
| • Land at Norton Grove, Norton   | 0.78ha | B1,B2,B8 uses |
| • Agri-Business Park and Business Technology Park, Eden House Road, Malton | 17.8ha | B1,B2,B8 uses |
| • Land to the west of Kirkby Mills Road, Kirkbymoorside                    | 0.49ha | B1,B2,B8 uses |

Sites which currently have planning permission for employment uses will continue to be supported in principle in the event that their current permission expires.

### Employment Land Allocations

- Land to the south of Thornton Road Industrial Estate, Pickering 6.6 ha (B1 and B2 Uses)

The release of additional employment land to meet outstanding identified requirements over the course of the plan period will be supported in principle at the following broad location subject to it being demonstrated that material planning considerations can be satisfactorily addressed:

- Land to the north of the A64 and to the east of the A169, Malton (B1, B2 , B8 Uses).Particular consideration will be required in respect of ensuring:
  - Appropriate Surface water management;
  - No adverse impacts on the safe operation of the Strategic Road Network; and
  - No adverse impacts on the water quality of the River Derwent SAC
  - Articulation of archaeological sensitivity through comprehensive geophysical survey and trial trenching where appropriate

### **Policy SD13 Expansion Land for Existing Employers**

The following sites, as indicated on the Policies Map, are allocated for the future expansion of the existing major employer:

- Land to the South of Sylatech, Kirkbymoorside
- Land to the south of Malton Foods (Zwanenberg), Amotherby
- Land to the north of BATA, Amotherby

In the event that these sites are not required by the respective company during the plan period, they will not be available to other business uses.

- 3.8 The previous development plan for Ryedale allocated expansion land for a small number of existing large employers who had, at the time, indicated that additional land was required to support the expansion plans of the businesses. This included land for BATA, Amotherby; Westlars (now Malton Foods), Amotherby; Micrometalsmiths (now Sylatech), Kirkbymoorside and McKechnies, Pickering. To date, the expansion land at Pickering has been utilised and an application for the extension of the Sylatech premises into the expansion land has been made. Each of these companies have confirmed that the availability of expansion land remains relevant to their businesses. Therefore the allocation of the expansion land for Sylatech, Malton Foods and BATA is carried forward into this plan period and is identified on the Policies Map. However, these sites have not been included within Development Limits (as has been the case historically) in order to ensure that they provide for and reflect only, the specific circumstances of these employers. It should be noted that the Plan (Policy SP6 of the Local Plan Strategy) is generally supportive in principle of the release of land for the expansion of all existing major employers/established businesses should this be required and the fact that a particular company does not have expansion land space identified in this plan would not prevent their expansion in principle.

#### 4 Land for Retailing

- 4.1 Policy SP7 of the Local Plan Strategy (LPS) establishes the additional requirement for additional food and non-food retailing space. It sets out how this will be distributed at different settlements and confirms the sources of new retail space in different locations. In this respect and in view of the fact that SP7 directs the majority of the new retail space to the Principal Town, the Plan only seeks the allocation of land at Malton and Norton as a means of addressing requirements for additional retail floorspace. This is alongside the sources of new retail space that will be provided through the conversion and extension of existing buildings and the redevelopment of land within or on the edge of each of the Town Centres, including Pickering, Kirkbymoorside and Helmsley.
- 4.2 A significant proportion of the retail floorspace requirement is already committed. The existing planning permission for the redevelopment of the Malton Livestock Market site currently accounts for quantitative food retailing floorspace requirements. The Livestock Market site together with other mixed use proposals at the former Dewhirst factory site in Norton, new retail space at the Kings Head Yard, Malton and the ancillary retail element of the Malton Agri-Business Park scheme account for the majority of the non-food retailing space (circa 4,500 sqm) which the LPS directs to the Principal Town.
- 4.3 The Local Plan Strategy recognises that the Livestock Market Site (LMS) provides a key development opportunity in a location which immediately abuts the existing Town Centre and within the 'Northern Arc' - the stretch of land around the Town Centre which the plan recognises as having potential to accommodate further town centre uses, including new retail space. Planning permission for the redevelopment of the Livestock Market Site has existed since 2012 and the scheme technically commenced in August 2017. As well as recent changes and restructuring in the food retailing sector, it is understood that a planning permission granted for a food-led retail scheme on an additional site - Wentworth Street Car Park has frustrated investment in the LMS site. The car park site is owned by the Council and the redevelopment scheme for the site was promoted in partnership with a development partner. In 2015 the planning permission for the car park site was quashed following a successful legal challenge to the permission by the owners of the LMS site and the planning application for the car park site is no longer being progressed.

- 4.4 In order to support the redevelopment of the LMS site and to provide some certainty for the owners of the site as well as businesses in the Town, the LMS site is identified on the Policies Map as a retail commitment and the Town Centre Commercial Limits have been adjusted to include the site within the Town Centre Commercial Limits. It is considered that this should support the timely redevelopment of the site which will, in turn provide certainty over the precise level and type of retail space to be accommodated in this location, if the configuration of retail space in the current permission needs to be adjusted to reflect current and emerging needs of the retail sector.
- 4.5 Against this background, sites to address the limited shortfall (circa 900 sqm) in non food retailing space at Malton and Norton have not been specifically allocated in this plan. The Local Planning Authority will work with landowners and developers to bring forward appropriate schemes within Malton and Norton Town Centres and the 'northern arc' area of opportunity which is identified in the Local Plan Strategy.

**Policy SD14 Retail Commitments**

The Malton Livestock Market Site, Malton and former Dewhirst Factory Site, Norton will continue to be supported for retail development in principle in the event that existing permissions are not implemented

## 5 Specific Sites: Flamingo Land and the National Agri-Food Innovation Campus (NAFIC)

- 5.1 The Plan (Policy SP1 of the Local Plan Strategy) uses Development Limits as a policy tool for managing development. Most of the Development Limits exist to manage the growth of the Market Towns and villages. However, two specific sites, Flamingo Land and the NAFIC Site have site boundaries which are defined on the Policies Map. Flamingo Land in the Vale of Pickering is a nationally renowned tourist attraction consisting of a fun park, zoo and holiday village. Development Limits for the site were established in the previous Development Plan and are carried forward into this Plan. The NAFIC site at Sand Hutton in the Vale of York was established as the then Ministry of Agriculture's Central Science Laboratory. The site is now the National Agricultural and Food Innovation Campus and is a base for the Government's Food and Environmental Research Agency together with other organisations based around agri-food and health. It is an ambition of the Local Economic Partnership that the site becomes firmly established as a national/international centre for food science, agri-tech, health and bio-renewables. The boundaries of the site were defined in the previous Development Plan and are carried forward into this plan.
- 5.2 Proposed development within the Development Limits of Flamingo Land and within the boundaries of the NAFIC site to support these uses will be supported in principle. Both sites lie within the open countryside and any additional development within the development limits/site boundaries would need to be acceptable in terms of a range of development management issues, including the impact of additional traffic as well as landscape and visual impact. The latter is a particularly relevant issue in terms of the height and mass of structures at both sites which are located in the relatively flat Vales of Pickering and York. The southern boundary of the NAFIC site also adjoins the outer boundary of the York Green Belt.

### **Policy SD15 Specific Sites: Flamingo Land and the National Agri-Food Innovation Campus (NAFIC)**

The Development Limits for the Flamingo Land Theme Park and the site boundaries of the NAFIC site are as defined on the Policies Map. Proposals for additional development within the boundaries of these sites will be supported in principle, subject to policies within the Local Plan Strategy

## 6 Visually Important Undeveloped Areas

- 6.1 The previous Local Plan for Ryedale defined 'Visually Important Undeveloped Areas' (VIUA's) as a policy designation to protect specific open sites in or on the edge of settlements. Sites are identified as VIUA's for one or more of the following reasons: a site makes a significant contribution to the character or setting of the settlement; a site provides an attractive setting for buildings within a settlement and/or; a site makes an important contribution to the historical form and layout of a settlement. As such, the role of a VIUA can differ in different locations. For example, within many settlements VIUA's are often smaller spaces which are integral to the historic form and character of a place or which contribute to the setting of heritage assets within a settlement. In general, the VIUA's on the edges of the Market Towns are aimed at protecting areas which, by virtue of their open nature make a significant contribution to the setting of a Town and the role of the setting in influencing and framing the traditional form and character of the settlement. To this end, these sites tend to be larger in scale than VIUA's within settlements.
- 6.2 Existing VIUA's have been reviewed in the preparation of this document and are shown on the Policies Map. The preparation of this document has provided the opportunity to identify further VIUA sites. For example, a number of new VIUAs have been informed by more recent up to date Conservation Area Appraisals. In addition, further VIUA sites have been identified in the context of the current strategy of the plan which places a greater emphasis on the expansion of the market towns than previous development plans for Ryedale. The site selection process used to assess the sites put forward for development by landowners has considered the merits of sites in terms of their contribution to the form, character and setting of settlements. This has enabled development requirements (in particular housing requirements) to be accommodated at settlements in accordance with Local Plan Strategy alongside the identification of further VIUA sites on the edges of some of the towns. It is important to emphasise that landscape quality in itself is not a reason for the designation of a VIUA. There are many areas surrounding towns and settlements that are valuable in terms of their landscape character and aesthetic qualities and the Local Planning Authority will take account of this through the application of Policy SP13 (Landscapes) of the Local Plan Strategy.

### **Policy SD16 Visually Important Undeveloped Areas (VIUAs)**

In addition to the existing VIUAs which are identified on the Policies Map, the following new sites are designated as VIUAs and are shown on the policies Map:

- Land at Folliott Ward Close, Middlecave Road, Malton
- Land to the north of Peasey Hills, Malton
- Land to west of the Church of St John, Welburn
- Land to north of Slingsby Castle and west of the Lawns, Slingsby
- Land between Amotherby and Swinton south of the B1257
- Land to the north of Worsley Arms and south east of the village hall, Hovingham
- Land at Knoll Hill, Ampleforth
- Land to the south and west of St Hilda's Church, and north of Millway, Ampleforth
- Land to the rear of Ludley House, Ampleforth
- Verges, Main Street, Ampleforth
- Land west of St Benedict's School, Ampleforth
- Mickle Hill, and land to the south of Mickle Hill, Pickering
- Land between Welham Road and Langton Road, Norton
- Land north of Westgate Lane, Old Malton

## Appendix 1 :Saved Local Plan policies to be superseded by the policies in this document.

### Policy

- H1a Managing the release of land
- H2 Housing allocation, Scarborough Road, Norton
- H3 Housing allocation, Whitfield Avenue, Pickering
- H4 Housing allocation, Goslipgate, Pickering
- H5 Housing allocation, Feversham Drive, Kirkbymoorside
- H6 Residential allocations in the villages
- EMP2 Industrial/business development allocation, Norton Grove Industrial Estate
- EMP3 Industrial/business development allocation, East of Thornton Road Industrial Estate, Pickering
- EMP4 Industrial /business development allocation, Kirkby Mills
- EMP7 Allocations for the expansion of existing major employers
- EMP14 Central Science laboratory
- EMP15 North Yorkshire Power project, East Knapton
- TM6 Tourist Attractions

*Note: The adoption of the Sites Document and Policies Map (2012-2027) will ensure that all of the saved policies of the Ryedale Local Plan (2002) are superseded.*

## Appendix 2: Residential completions, commitments, residual requirements and proposed allocations

Settlement	Completions (net) 2012-2017	Commitments (net) *	Local Plan Housing Figure	Residual Requirement	Planned requirement + supply buffer	Residual Requirement + supply buffer	Proposed Allocations	Total
Malton and Norton	604	650	1500	246	-	-	600****	1,854
Pickering	334	116	750	300	-	-	360	810
Kirkbymoorside	15	292	300	-7	-	-	61	368
Helmsley	9**	97	150***	0	0	-	0	106
<i>The Helmsley Plan was adopted in July 2015. It makes provision for the delivery of 190 homes to 2027, 97 of which are from land allocations within the Ryedale Local Planning Authority Area. The Local Plan Sites Document will not identify further housing land at Helmsley</i>								
Service Villages	159	199	300	-58	-	-	76	434
<b>Total</b>	<b>1,121</b>	<b>1,354</b>	3,000	481	3,600	1,081	<b>1,097</b>	<b>3,572</b>
<b>Other Villages and Wider Open Countryside</b>	153	177	0	0	-	-	0	-
<b>Total</b>	<b>1,274</b>	<b>1,531</b>	3,000	481	3,600	1,081	<b>1,097</b>	<b>3,902</b>

\* The completion and commitment information shown is taken from the 2017 Strategic Housing Land Availability Assessment Part 1 together with additional large site permissions/minded to approve decisions. These include a further 87 dwellings at Malton (The Showfield); 52 dwellings at Pickering (Firthland Road); 12 dwellings at Picketts Yard (Sheriff Hutton) and 26 dwellings at East Hill House. The commitment figure for Malton and Norton does not include the 62 Units at the ATS site.\*\* Completion figure for Helmsley is for the area of the town outside of the National Park.\*\*\* Provided across the area of the Helmsley Plan.\*\*\*\* Assumes 540 dwellings from the Norton Lodge site within the plan period.
