Provisional quote for refurbishment of the Kirby Moorside basketball area.

FAO Kirby Moorside Town Council

Please find a quote and proposal to improve the basketball court within the park.

Following the site meeting, we were tasked to come up with a long term hard wearing solution, to make the basketball court more accessible to a greater range of different aged children.

Our proposal is to install a free standing curved half gallery boundary onto which a number of different accessibility and educational panels can be added, for example lower hoops for young children, educational graphics boards and hoop games.

The physical design and appearance will be personalized to suit the local area and residents, This will be performed subject to proposal approval.

This would be done using a range of materials, the gallery boundary would be constructed from galvanized steel for durability and longevity and the educational panels can be updated as time passes allowing for greater inclusion over a longer period.

All the materials used have a manufacturer lifespan of 25 years.

We have broken the quote down into separate parts as well as providing an overall quote.

For the manufacture and installation of:

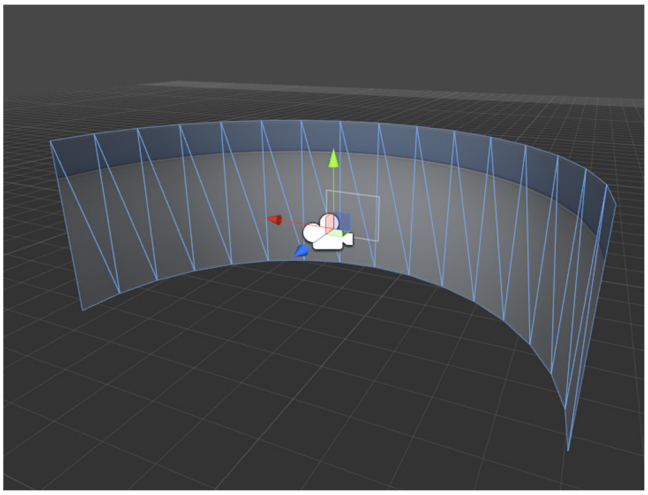
Curved half gallery boundary = £1639.20

Educational panels x5 = £769

3 lower height hoops for younger children = £270.20

Additional panel hoop games = £327.65

Total for the whole project with 5 % discount = £2855.74



Curved gallery wall

this will be constructed using galvanized steel post and heavy duty mesh.

Example of additional hoop games, can be modified for wall mounting

.

Example of educational panels. Designs can we custom made to fit the local area.
