Following our site survey I have put forward a few options for discussion at your meeting this Thursday.

The play schemes can have multiple options but we have selected 2 options that we hope will fit both your brief and your budget.

#### Multi Play Unit Option 1 Be-Bop Plus c/w Plastic Slide

The first option we have chosen is a mix of timber, steel and a plastic slide (See attached graphic)

This would be supplied and installed on the level ground close to the stainless steel embankment slide and would require an area of grass matt safety surfacing of 11m x 6m

We would install it in line with the playground fencing to overcome the slight gradient

Total Supply and Install Price = £10,243.75 + Vat

#### Multi Play Unit Option 2 Shimmy Plus c/w Plastic Slide

The second option we have chosen is a mix of timber, steel and a plastic slide again ( See attached graphic )

This would be supplied and installed on the level ground close to the stainless steel embankment slide and would require an area of grass matt safety surfacing of 10m x 7m

We would install it in line with the playground fencing to overcome the slight gradient

Total Supply and Install Price = £9377.94 + Vat
