

[REDACTED]

Dear Sir/Madam

I have lived in Keldholme for over 30 years on the outskirts of Kirkbymoorside, a small market town with many activities and local shops. It is surrounded by lovely countryside with pavements, footpaths and public transport on a regular basis.

The area is ideal for children of all ages and Keldholme is within reach of a play park, a nursery school and primary school by using well made pavements.

My friend Carrie and her family would like to purchase a large converted barn in Keldholme offering ground floor accommodation with open planning. This would be ideal for their daughter ruby who has disabilities. Ruby has made outstanding progress from what was predicted during her first four years of life.

The present home of Ruby does not offer any of the needs for a disabled child.

Minor alterations to the barn in Keldholme will offer all the facilities including a large levelled garden with unspoilt views of the countryside.

The spacious garden would give Ruby and family the opportunity to experience outdoor life and the freedom she deserves.

As well as a spacious garden, there is room for a play area, sandpits and pets.

It would also give the family their chance to give Ruby more mobility that she has not been able to enjoy.

Covid 19 had kept the family housebound in Pickering and a bee home in Keldholme would give the whole family a lovely long awaited future ahead.

Yours faithfully,
