

Ryedale View Play Area - Proposal 2

As discussed, there's a few suggestions below that would make welcome additions to the play area.

Once you have a clearer idea about what the local community would like, when you are closer to moving forward with the project and have a clear budget get in touch, we can then create a 3d render and quote for you no problem.

2-6 years age group

Something from our young explorer range like the Marco Polo tower units.

(the slide can be replaced with alternate play component, or if you want to stick with a slide we can do with the polycarb or steel)

Approx 7.5k installed.

No safety surfacing required on this as the fall height is below that of whats required however, I'd suggest Grass saver matting in the high impact / high footfall areas (bottom of slide, bottom of steps etc)

Springers

Several different designs but I've just added images of 3 below for examples.

Approx. £1 500 installed.

For ages 7 and up

Pick up sticks 10.

Agility 15 Trim Trail

28m long – (doesn't have to be installed in a straight line as illustrated below) – you can see a video link below of one we recently installed at a school in Mansfield, Nottinghamshire)
Approx. 10k installed.
(No surfacing required to meet regulations – fall height is below 1.4m onto grass)

Inclusive play

We can do a double bay swing as below, that includes two flat seats and a nest swing.
The nest swing is approx. 1.2m width – so plenty of room for a child and carer.
Approx. 5.5k installed.
Safety surfacing would be required (separate costs depending on preference)

Inclusive Roundabout.
Swirl Roundabout
Approx. £5950 Installed. Would require surfacing around the perimeter (additional cost)

Eden Giant Chimes.
featuring 8 anodised aluminium chimes elegantly with 100% recycled plastic posts.
These vibrant chimes come in a multicoloured design with a standard black posts. Custom colour options are also available upon request.
Approx 4k installed.
