

Dear Sir/Madam,

It has been brought to my attention that West End in Kirkbymoorside is not safe for residents. Cars are flying down there, pulling onto the path at speed, putting residents in danger. We've heard about two incidents: one person was trapped in their house and another was nearly hit by a car while pushing a pram! Fortunately, I have many solutions for you to consider.

My first argument is cars going onto the path. I thought you could make the road a bit bigger and make it a one way. My second argument is parking. Do you know the pet shop in West End? Nobody ever parks their and it is always free. My third argument is speed limit. Because it is 30mph right now maybe move it down to 20 so the cars will

Hopefully I haven't asked too much but
please try and fix West End.

Your Sincerely

Dear Sir/Madam,

It has been brought to my attention that West End in Kirkbymoorside is not safe for residents. cars are flying down there, pulling onto the path at speed putting residents in danger. We've heard about two incidents: one person was locked in his house for hours because of a delivery van parked on the path and another was nearly hit by a car with a pram! From a car pulling onto the path. Fortunately, I have many solutions for you to consider.

First of all people mounting the curb, cars/vans can block people in their houses and people are getting hurt by cars coming onto the path to pass other cars. To stop this, you could put bollards in place. Car parks are another thing. A lot of people struggle to park who live down West End. There is a car park behind the library that knowone uses. With people park down West End there is not a lot of room to drive. And now speed, if you go to fast and meet another car then you would go onto the path. You could change the speed limit to 20mph or you could put bumps. I believe if you were to use some of these suggestions West End would be safer.

Yours sincerely

Dear Sir/Madam

It has been brought to my attention that West End in Kirkbymoorside is not safe for residents. Cars are racing down there, pulling up onto the kerb at high speeds, putting residents in danger. We've heard about ~~two~~ incidents: an elderly man was trapped in his house for hours because a van parked outside his house and he couldn't get out. The other incident was someone almost being hit by a car whilst pushing a pram! Fortunately, I have some solutions.

My first idea is making it one way, this would make cars go faster but you could reduce the speed limit to 20, add some fake speed cameras to scare drivers and include some speed bumps. The other problem with making it one way is buses,

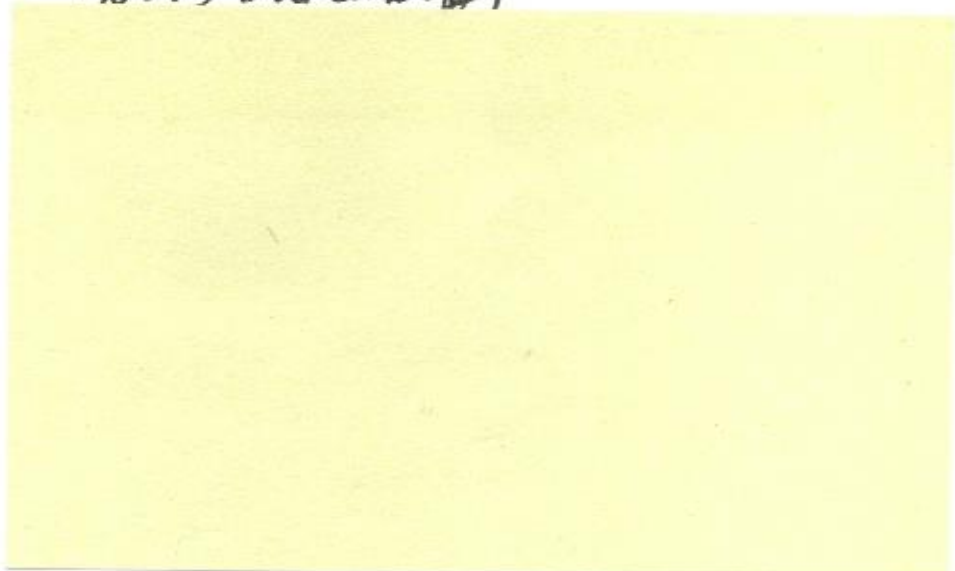

they have to go up and down West End.
My solution to the problem is one way downhill
and turning left on the first left, joining up
with the A1 and looping back round.

Another problem is cars from both sides trying
to get past each other, I had an experience
with this a few days ago, this is what happened.
I was biking down West End, safely with a
bike helmet on, and I heard some cars coming
behind me and a lorry and a van in front of me, I
quickly went into a driveway to escape. I
watched the rest of the scene pan out, it went
like this. The lorry went up onto the kerb to
let the cars go past, but then the car at
the front went on the kerb to let the lorry
go past and then the cars behind started
beeping their horns at the first car! It was
absolute chaos but luckily the van driver
let me past. This could be with one way

add bollards on the pavement and leave spaces
to park and for emergency services.

I hope you consider some of my solutions.

Yours Sincerely,

Dear Sir/Madam

It has been brought to our attention that that West End is not safe for residents walking past. Cars are speeding down there pulling up on the curb, blocking people from getting past and parking very silly. You have the power to stop this so I have some solutions.

Some people park in two spaces which causes people to walk along way to walk to their destination. This could be solved with lines for parking in. People get very annoyed about this so maybe consider my solution.

Another problem is about crossing the road. I think you could put a zebra crossing or ~~baller~~^{any other} crossing really. People should stop it is their right of way.

The last problem is about people parking in the way of the park. You could place a barrier or bollard on the curb so they can not park in the way of house and block people from getting out of their house.

You have the power to solve these problems.

Dear, Sir/Madam

I am here to incer you as dangers in west end,
Northyorkshire, Kirkbygrooside, is not safe for people walking
on the side path cars witting and glying down this
very road, people pressurized to close the the wall and
crammed in cars going on the path as they wizz down
like a threat So fortantly, I have some concludions to consider.

If I can consider a one way system. I know about the busses.
but I have a concludions they can go around West end
and back down and I know they will go faster then they
should so a speed 60 sign and a dummy speed camera.

I hope you take this into consideration,
Yours, Sincerely

Dear, Sir / madam,

I, am writing to you about the safety of the residents on West end in Kirkbymoorside, Jostly Speed is a real problem and people pull onto the path at great speed putting residents in ~~serious~~ ~~serious~~ ~~serious~~ danger. We have been informed of two warning incidents, one person was trapped in their house for hours they tried opening the door but it was blocked by a lorry. The second complaint was about a post woman walking innocently down West end when a car drove up onto the path with speed nearly hitting her but luckily she squashed against the wall and the car just rised her! Fortunately I have many solutions for you to consider.

Firstly we could possibly make the street one way, I am aware that cars would go even faster so we could acquire speed restrictions like speed bumps or a jalle speed camera

another idea is that you could put double yellow lines on both sides of the road, but this means no parking I know but in Kirkbymoorside there is a massive parking problem that

Is never used behind the library it could quite easily hold all the cars in West end you could make it free for residents in West end.

(To stop cars pulling onto the curb we could add bollards)

(The other day my friend Oliver was walking down West end when 3 cars and 1 lorry and 1 van the lorry sped up onto the curb to let the car past and the car skidded off onto the curb and nearly hit him!

Thank you very much for reading this I hope you consider my ideas to make West end a better place,

all the best

Dear Sir / Madam,

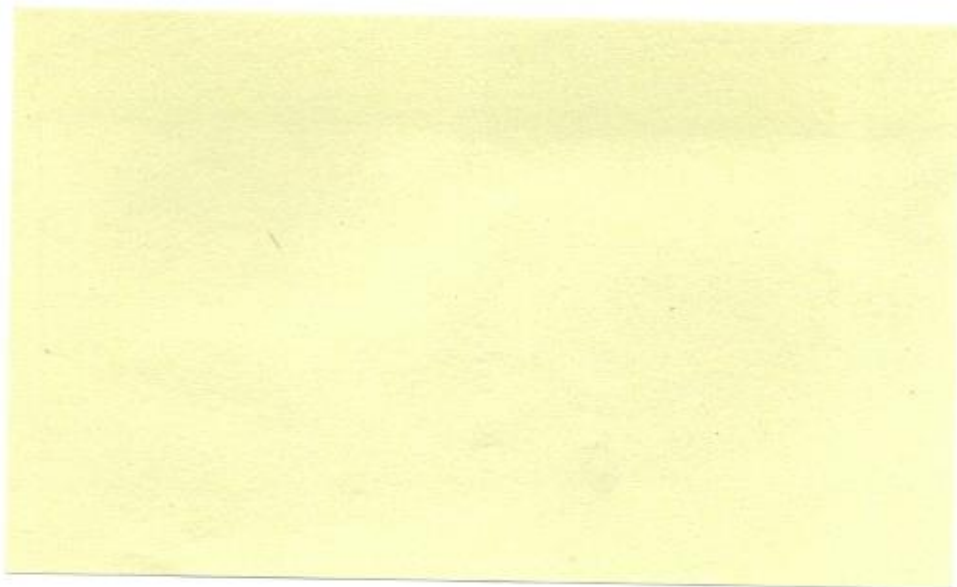

It has been brought to my attention West End Kirkbymoorside is not safe for residents. Cars are flying down there, pulling onto the ~~foot~~ pavement with speed putting residents in danger. We've heard about the two incidents: one elderly man was trapped in his foot hours due to a lorry that was parked with ~~two~~ all four wheels on the pavement, also a lady with a pram had to press against the wall because a van came speeding up the cobb nearly taking her and her baby out! Fortunately, I have some suggestions for you to consider.

Firstly people are mounting the cobb with speed, so my suggestion is bollards, we know that they might not look that good and also emergency services might not be able to get past, but I know a good suggestion

for this, we can put a few medium sized parking spaces for emergency services. We were also thinking about the people parking on the road and the two way system of cars so we were thinking of making the road one way, we know that this will make drivers go faster so my suggestion is to put speed bumps and maybe a fake speed camera.

I hope you take these suggestions into ~~and~~ consideration.

Yours Sincerely

Wednesday 23rd May 2018

Dear Sir/Madam,

It has been brought to the town folk's attention that West End (in Kirkbymoorside) is a hazard to the residents. Pedestrians are becoming more and more scared of their safety.

Pedestrian and Car safety

Some people are concerned on their safety whilst being on the pavements. The speed is a danger to small, young children. We have heard of two incidents: one lady was nearly knocked over whilst pushing a pram and the other was an elderly man who had the inconvenience of being blocked in his house for hours on end. I fortunately have some solutions; we could reduce the speed restrictions, add a zebra/pelican/toucan crossing and add a few speed bumps to top it all off. We could make the road one way, this may have an effect on the speed of the traffic but hopefully the speed bumps should do the trick.

People have been mounting the kerb and it is just not safe. I personally think we should put up bollards. Some of the residents may disagree and it costs a lot of money but the safety will be cheaper in the long run.

Yours Sincerely,

Dear Sir / Madam,

It has been brought to my attention that West End Kirkbyside is not safe for residents. Cars are swerving onto the Pavement at high speed, putting people in danger.

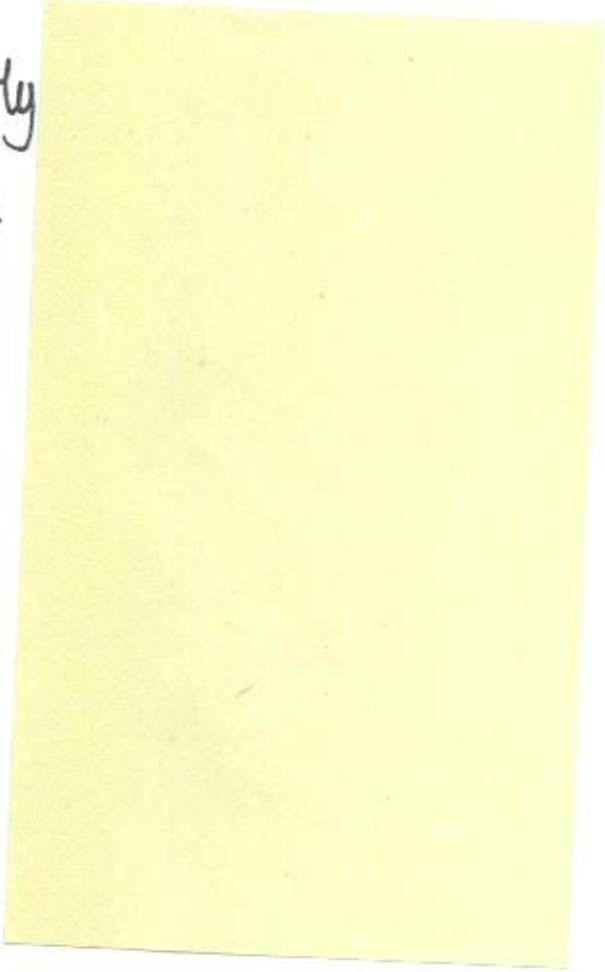

We have two Comptanments: One has almost been hit by a car with a pram. And the other been stuck in there house for ages.

Thankfully I have come up with some ideas to make West End Safer.

People are driving too fast, So maby you could change the speed limit too to 10 or 20 mph and make Speed bumps but if we put Speed bumps and people Park on the curve it would make it shard for people to get of the curve So could you not make the Speed bumps right toooo people park

People are swerving onto the pavement with high speed, so you could make the the road 1 way so the cars could get ~~pass~~ more space to drive. But cars could be speeding down lanes so you could put speed humpes ~~tr~~.

Your Sincerely
Thank you

Thursday 24th May 2018

Dear sir/Madam

It has been brought to my attention that West End in Kirkbymoorside is not safe for residents. Cars are flying down the road, pulling onto the paths at speed, putting people in danger. We've heard about two incidents. One person was trapped in their house by a lorry another nearly got hit! Fortunately, I have many solutions for you to consider.

We found it is dangerous cars are mounting the pavement which is illegal and they might hit someone they do this to overtake, ~~no~~ maybe every four parking space add double yellow lines so cars can overtake.

There has been a delivery that blocked someone in their house and blocked people on the pavement maybe there could be delivery parking near the pet shop

If cars are driving on the pavement quickly they can hit someone getting out of their house and seriously hurt them.

Maybe change speed limit to 15mph or 20mph and add speed bumps.

I believe that these conclusions will make West End a safer place

your sincerely,

Dear Sir/Madam

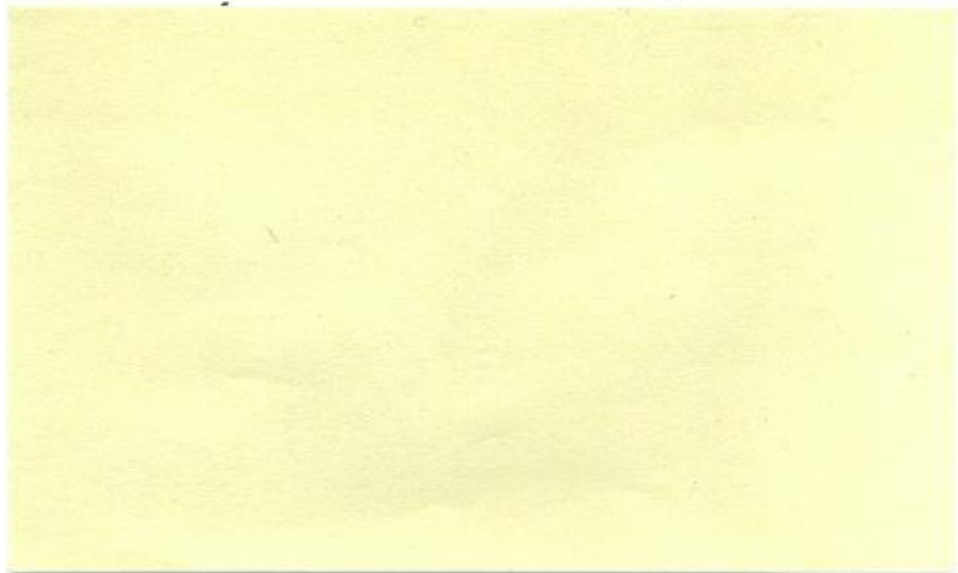

It has been brought to my ~~attention~~ attention that West End in Kirby Moorside is not safe for residents. Cars are flying down there, pulling onto the path at speed, putting residents in danger. We have heard about two ~~idents~~ incidents: one person was trapped in their house and another was nearly hit by a car while pushing a pram! Fortunately, I have many solutions for you to consider.

The residents of West End are having a major parking problem. There are plenty of parking spaces free in town but this has started trapping people in their houses, however my solution is to make the car park behind the library free.

Speed is also a major problem people illegally drive on the curb others are going over the speed limit and nearly hitting people.

My solution is to put in a Speed Sign and a Speed camera. I think if you make a free car park there would be less trouble.

Yours Sincerely

Dear Sir/Madam.

It has been brought ~~to~~ ^{to} my attention that West End in Kirkbymoorside is not safe for residence. cars are flying down West End, pulling up on the curb and not caring for others. We've heard about two accidents. one person was trapped in their houses and another was ~~not~~ nearly hit by a car while pushing a pram! unfortunately, I have many ~~in~~ complaints!

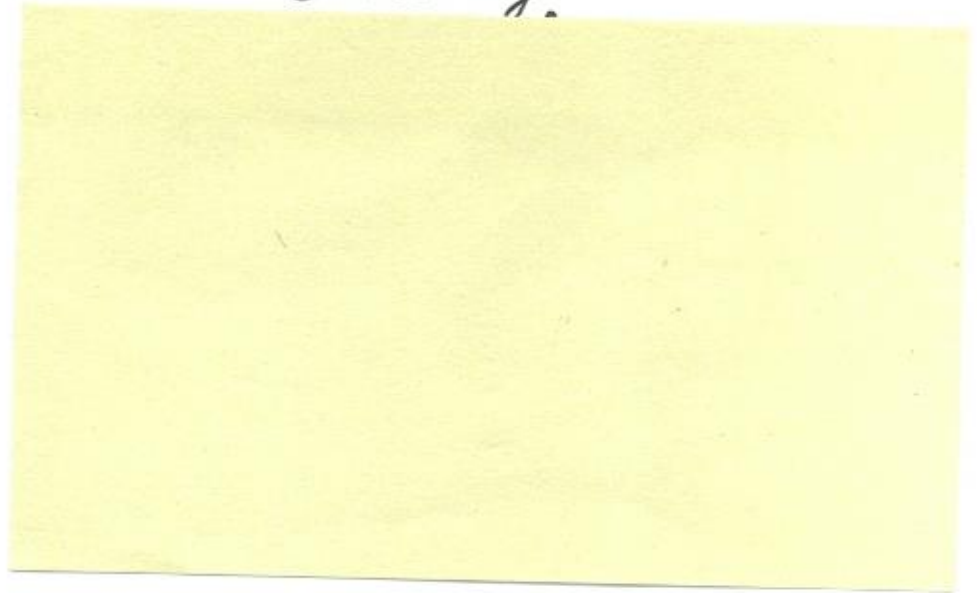

People can't get out their door way. People walk on the path and get into danger. cars drive on the path get ran over. You could get people to not park on the side of the road. fill in the pot holes so car wheels don't get damaged. Reduce speed down West end. make the road one way but if it was one way the buses can't get up West End. down the side of the road make some double yellow lines.

~~Get~~ Get people to not park on the side of the road.

there is enough space for parking your car some
where else. Speed ~~on~~ cameras is another option.

Place some speed bumpers. I still I ~~see~~ still
have money compliments to this. It would be great
to put speed bumpers and double yellow lines down
west end.

Yours Sincerely,

Dear sir / Madam,

It has been brought to my Attention that West End in Kirkbymoors is not safe for residents. I'm asking you about it because it's going viral; and loads of residents are getting concerned of the safety you've got to fix it.

People are complaining about West End because cars are parking on the pavement and people have to push against the houses. And one man got stuck in his house.

Maybe you could make the law more popular about parking two wheels on the pavement because it's illegal.

Maybe you could make the pet shop car park bigger and better so that people who live there can park.

Maybe make people take photos of the number plates of which a parking in uncertain places.

People are speeding up West End and it's starting to get very dangerous we should have some restrictions or something but what about all the big vehicles?

Maybe you could have speed bumps which will make cars go much slower it will probably help.

Maybe you could reduce the speed because at the moment the speed is 20 mph, I think it should be 15 mph.

Maybe you could put bollards to stop high speed. But the only problem is, is that silly adults or children might jump over them and slip onto the road.

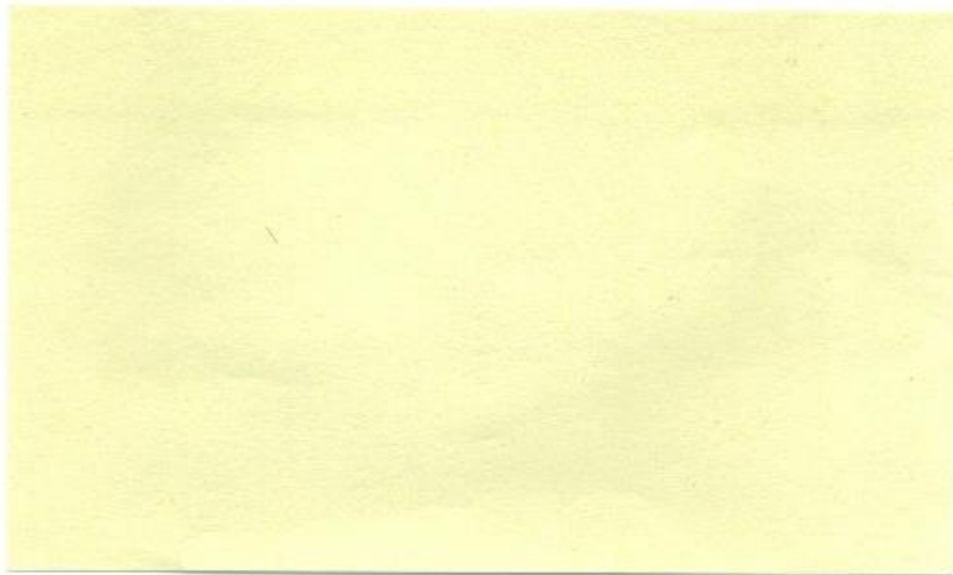

People are not happy with the car parking situation. You need to do something about it please please please!

Maybe you could make double yellow lines because it wouldn't affect people getting out of their houses. Although some drivers just ignore them.

Maybe you could have a one way system because it will make it less chaos and it doesn't help buses but it would be amazing.

Maybe you could make the parking for residents and emergency services and if not they will get a fine.

Please help it would make life much much much easier and people who live there happier. You've got the power.

Thursday 24th May 2008.

Dear Sir or Madam

Hello I'd like to inform you about the problems on West end road Kirkbymoorside. This letter is telling you all about West end problems and the safety of the residents at risk. West end's problems are people speeding onto the path, 4 wheels onto the path, people parking where they are not supposed to and places where it is against the law. We've heard about two accidents: one person was trapped in their house for hours trying with all their might to open. He couldn't get out because a lorry parked right outside his house and another squeezed into the side of the road because a car was parked and didn't see her and her baby in the pram. But thankful I have some solutions for you.

Two ways.

Firstly two way is a bit of a problem because when two cars are coming at the same time one car has to move onto the footpath to let the other car go. I think West end would be better if it was a one way because

Noone anymore would have to Move onto the footpath to let the other person past. But I know the cars would go faster so add speed bumps onto the road and that will make sure that they cant go quick plus it would work because if you want to go up then Linley Garth and if you want to go ~~up~~ down then West end.

Parking .

Secondly parking is a problem because people in houses have nowhere to park because people are parking there parking space. My solution is add fake cameras so they are going to probably not going to park there.

Speed .

The speed could be changed because if we make it a one way then they would go faster so maybe change it to 20 instead of 30.

I hope you make this happen .

Yours Sincerely

Dear sir/madam

It has been brought to me that "West End" in Kirkbymoorside has some problems. That I would like to try to solve in "West End" Kirkbymoorside is not safe for people living there. Do you know cars are flying down the road, we are concerned for their good (safety) the cars are parking with two wheels on the pavement. Cars are speeding in weekend. One old man got stuck in his house for hours because a van was outside with four wheels on the pavement. Then a car came onto the pavement and every one had to stand against the wall.

Car parking!

People are parking on the pavement and it's illegal. People who own the car have responsibility.

Speed!

People are going faster than they should be going, you will get arrested

People going fast is bad for health

People don't like the noise

Making the noise can cause headache and you could get earache and some people like quiet things like I do

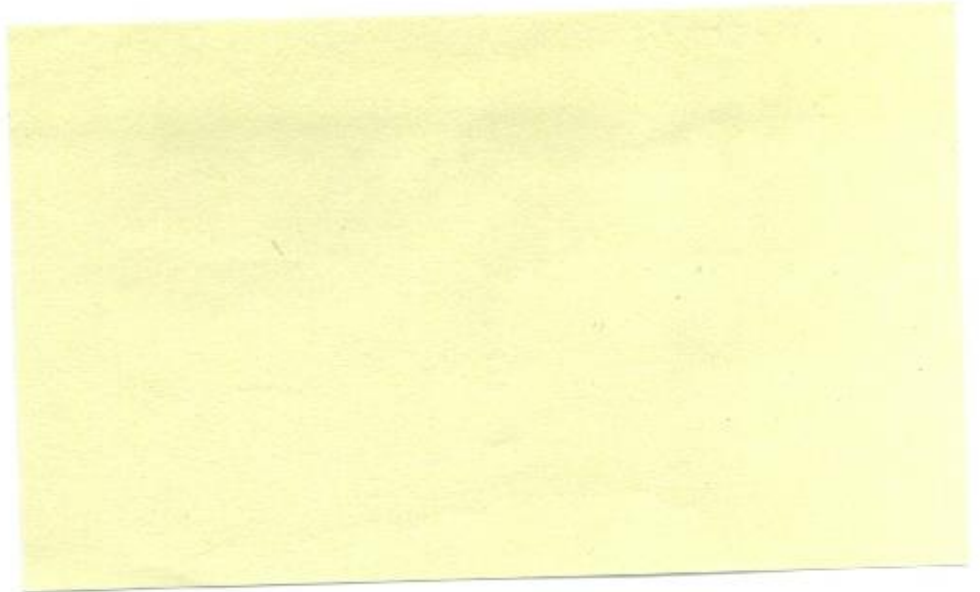

I have some conclusions

Please do something like something

to block the plate or put a zebra crossing for people

or put double yellow lines or traffic lines please do

something people might die!

Wednesday 23rd May 2018

Dear sir/madam,

It has brought to my Attention that West End in Kirkbysmeaside is not safe for residents. Cars are flying down them, pulling onto the path at speed, putting residents at danger. We've heard about two incidents: one person was trapped in their house and another was nearly hit by a car while pushing a pram! Fortunately I have a few solutions for you to consider...

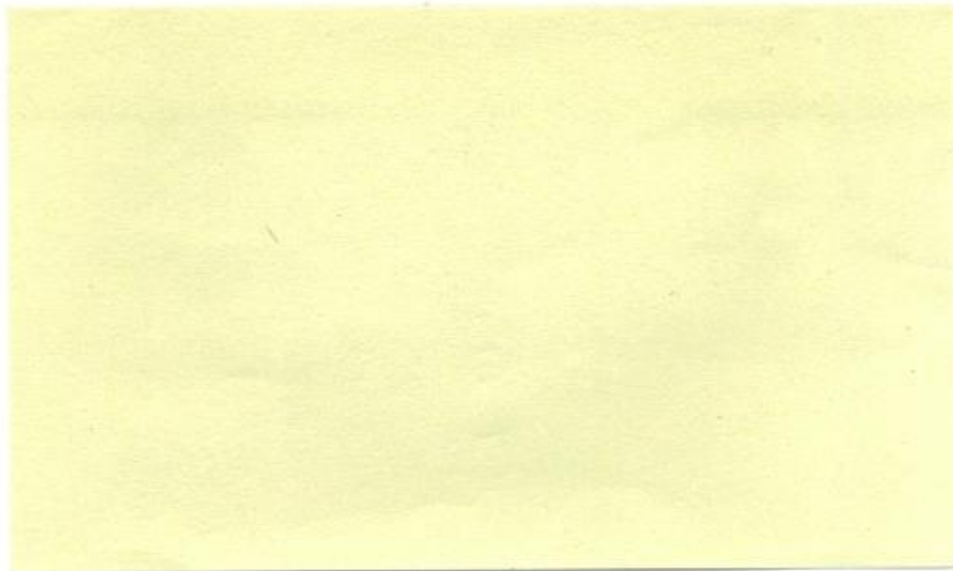

• Put a parking number on a block so people know who can park there and we have a plan for people who ignore the number. Have a scan robot that recognizes the number plate and if it is not the same car then it will get one alert and give

• Have a one way and put speed bumps /or/ and fake dummy speed camera and a sign saying 15mph.

- : Make a car park at the back of the pet shop for residents and/or make the town centre car park green.
- : Have speed not at the side of the pavement at the side of the road beyond the place where the car park so you don't brake the wheels.

Please take in mind the ideas

Yours sincerely

Wednesday 23rd May 2018

Dear Sir/modam.

It has been brought to My attention that West End in Kirkbymoorside is not safe for residents.

Cars are going down there pulling onto the path at putting residents in danger

We've heard about two incidents: one person was trapped in their house. and a woman was pushing her to prison and she had to lean against the wall. Fortunately I have many

~~solutions to consider~~ solutions for you to consider

you could put bollards on the path so they would bang it into the bollards instead of hitting people. or you could put one way and put speed bumps. or residents only

your sincerely:

Dear Sir / Madam

Wately West End in Killybegmoorside is not safe for residents .
All the residents are in serious danger because the cars are going on
the path.

This has lead to a old man , who's door got wedged in , so he
could not get out of his house because of a delivery van.

A women with a pram walking home but a car with 2 wheels , drove
on to the pavement , so I have made a few ideas for you to
consider.

My first argurment is cars, Van and bus are going on to the
curb with 2 wheels and it is illegal .

People can not walk , run and skip on the path because of cars
so for this could you make the path go in to the road.

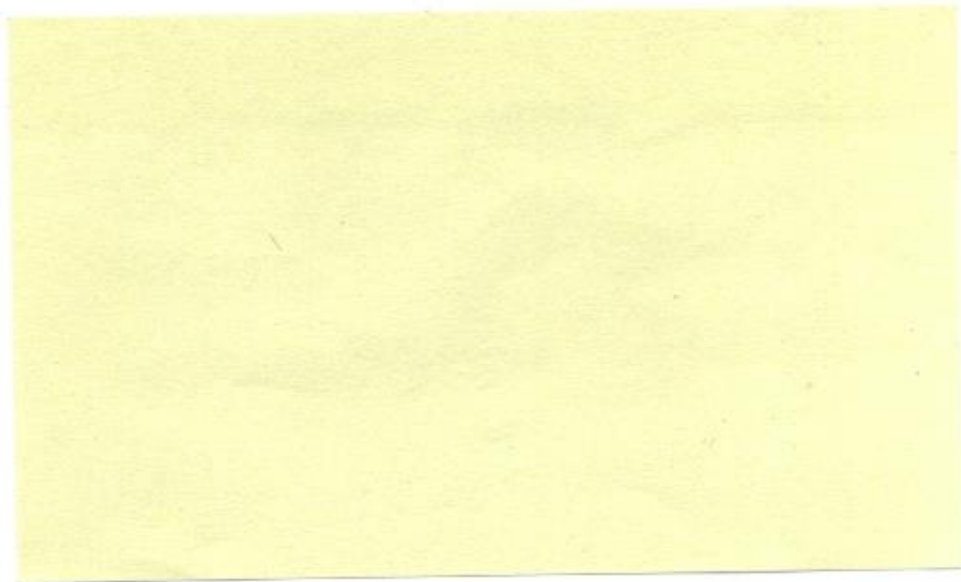

My Second argement is the Speed!

No one can cross the road so can you put fake speed
camers on the road

My third argument is parking!

There are no space for residents so people could make the post stop behind it could be a parking area

Thank you for reading.

Dear Sir / Madam

I had been brought to my attention that west end

is getting to dangerous firstly: Some one got trapped in there house
and a lobby nearly got worn over. cars are speeding as well and people can't
park. You could put a Speed Limit, You could make the park bigger so it can
go up it doesn't take as much space. The speed should be 20 mph and a zebra crossing.
Make weigh line to show each side of the road and fill the holes

Thank you for reading
