

Kirkbymoorside Town Council

Information for meeting on Monday 16 November 2020

- 9. Trees
- d. To consider options available for management of tree 0166 at the sports field

Assessment	Comments	Preliminary Management Recommendations
A	Large mature tree, large scar on southern side of main trunk hollowing in middle, Fruiting bodies of <i>Amillaria mellia</i> (Bootlace fungus)	Consider felling during the coming winter.
B	The Fungus is <i>pholiota squarrosa</i> , which is why the tree appears healthy in the upper crown. The fungus rots the root system and base of the trunk and will therefore lead to catastrophic failure rather than gradual decline.	Recommend that the tree is removed at some stage over the next 6 months. Recommend waiting until summer when vehicles will be able to get across to the far side of the sports field without causing damage to the pitch.

- e. To receive the quotation for works as recommended in tree safety assessments for Manor Vale woodland, Old Road play area, Ryedale View play area and the sports field and agree the works as necessary

Manor Vale Wood, Kirkbymoorside

Ref No:	Species	Comments	Preliminary Management Recommendations	Quote
0136	Ash Eastern side of top track	Large dead branch extending over track	Pollard below crown emergence	£220
0138	Ash (Young) On roadside leading to golf course	Dead, hanging over footpath	Fell	£100
0139	Ash (semi-mature) On roadside leading to golf course	Extensive die-back	Pollard to a practical level	£180
0140	Ash (semi-mature) On roadside leading to golf course	Extensive die-back	Pollard to a practical level	£180
0141	Elm(semi-mature) On roadside leading to golf course	Extensive die-back	Pollard to a practical level	£180
0142	Ash(Mature) On roadside leading to golf course	Extensive die-back over road)	Pollard to a practical level	£180
0142	Ash(Mature) On roadside leading to golf course	Extensive die-back over road)	Pollard to a practical level	£220
0514	Oak (Mature) At Gillamoor Road entrance	The Tomographic Survey carried out by Ian Barnes Associates identified internal decay in the main trunk in 2017. Whilst extensive decay was found it was determined that there was sufficient sound tissue to sustain the structural stability of the tree. However, the decay found is not a static situation and the amount of decay is likely to have increased over the past three years. Indeed Ian Barnes recommends that the tomographic survey is repeated this year.	It is strongly recommended that a further Tomographic survey be carried out this year to determine the current structural stability of the tree.	To be provided by Barnes & Associates

Ryedale View Play Area, Kirkbymoorside.

Ref No:	Species	Comments	Preliminary Management Recommendations	Quote
No number owing to difficulty in accessing	ash on NW boundary	Crown encroaching into neighbouring property	Crown reduces back to previous pruning cuts.	£100
0137	Field maple NW corner	Large cavity in main trunk	Pollard to a point below cavity	£150
1459	Pine North of garage block	Crown encroaching over neighbouring property	Crown lift over adjacent property to provide 4m clearance	£100
1463	Hawthorn Southern boundary	Crown encroaching over neighbouring property	Crown lift over adjacent property to provide 2m clearance	£80
No number owing to difficulty in accessing	2No. Young ashes Southern boundary adj. to No.12 Ryedale Crescent	Very spindly tall trees.	Pollard to leave a short stump to regenerate a lower canopy and allow the adjacent oak space to develop.	£120
1467	Pine Southern most pine, south west of 1459	Leans heavily in a southerly direction, with evidence of bark buckling in the main stem.	Remove tree within the coming winter	£200
	Oak in centre of play area	Large branches overhanging play equipment	Remove branches overhanging mulita-play unit	£100

Old Road play area, Kirkbymoorside.

Tree No:	Species	Comments	Preliminary Management Recommendations	Quote
T2	Lime	Semi-mature, healthy strong tree. Crown hanging low.	Crown lift to provide 2.5m clearance	£120
T4	Cut leafed alder	Young tree with co-dominant leaders. Crown on highway side growing close to overhead wires.	Reduce offending branches by a maximum of 1-metre.	£80
T7	Lime	Strong, early mature tree. Crown hanging over boundary hedge .	Crown lift of hedgerow side to clear the hedge by 1-meter.	£80

Sports field, New Road Kirkbymoorside.
